Overview

Disneyland Hospitality

12 Mo Occupancy	12 Mo ADR	12 Mo RevPAR	12 Mo Supply	12 Mo Demand
78.4%	$255	$200	7.8M	6.1M

The Disneyland submarket is one of the largest hotel submarkets in the United States, anchored by Disneyland Resort, Disney California Adventure, Downtown Disney, and the Anaheim Convention Center. Together, these assets create a powerful mix of leisure, group, convention, and event-driven demand that differentiates the market from virtually every other lodging destination in Southern California.

Disneyland Resort remains the primary source of hotel demand, attracting visitors from across the United States and internationally. The market benefits from a large and diverse lodging inventory ranging from luxury resorts and convention hotels to family-oriented select-service properties. While family leisure travel remains the largest demand segment, convention, meeting, and corporate-related travel have become increasingly important contributors to overall occupancy and rate growth.

The Anaheim Convention Center serves as the market's second major demand driver and provides an important source of weekday business. Major trade shows, industry gatherings, corporate meetings, and association events generate substantial room-night demand and help create compression periods throughout the year. This balance between leisure and group demand contributes to one of the strongest lodging foundations in California.

Several long-term catalysts are expected to support future growth. Disney's ongoing investment within the Anaheim Resort District, including future attractions, entertainment offerings, retail development, and supporting infrastructure, is expected to enhance the destination's appeal and sustain visitor growth over time. Additional demand tailwinds include major recent or upcoming regional events such as the FIFA World Cup, Super Bowl, and Olympic Games, all of which are expected to benefit the broader Southern California lodging market.

Despite continued labor and operating-cost pressures, hotel fundamentals remain healthy. Supply growth has been limited in recent years, helping preserve occupancy and pricing power across much of the market. Future additions remain relatively modest compared with the submarket's large existing inventory, supporting a favorable long-term outlook for owners and operators.

Against this backdrop, the following statistics further illustrate the size, composition, and operating profile of the Disneyland lodging market.

Disneyland comprises 97 hotel properties, which contain around 21,000 rooms. Among the subtypes, there are 10,000 Luxury & Upper Upscale rooms, 9,000 Upscale & Upper Midscale rooms, and 2,200 Midscale & Economy rooms in Disneyland.

As of August, Disneyland 12-month occupancy is 78.4%, 12-month ADR is $250, and 12-month RevPAR is $200. Year over year, 12-month occupancy in Disneyland has changed by 3.1%, 12-month ADR has changed by 4.6%, and 12-month RevPAR has changed by 7.8%.

Approximately 500 rooms are under construction in Disneyland, accounting for 2.3% of its existing inventory. Over the past 12 months, roughly 0 rooms have opened across 0 buildings.

The Disneyland submarket has historically been one of Southern California's most active and highly valued hotel investment markets, supported by the enduring strength of Disneyland Resort, the Anaheim Convention Center, and one of the nation's largest concentrations of hotel rooms. The market consistently attracts interest from private investors, institutional capital, REITs, and hospitality operators seeking exposure to a globally recognized destination.

Transaction activity has moderated significantly over the past year following an exceptionally active period in 2024. Investment activity during that year was highlighted by the sale of the Residence Inn Anaheim Resort/Convention Center and SpringHill Suites Anaheim Resort portfolio, which established some of the highest per-room pricing metrics achieved in the submarket during the past decade. Those transactions reinforced investor confidence in premium assets located near Disneyland and the convention center.

More recently, transaction volume has been limited. The most notable sale over the past year was the acquisition of the 352-room Anaheim Resort Suites, demonstrating that investor demand remains present for well-located, larger-scale assets despite a more challenging capital markets environment.

Elevated interest rates, refinancing pressures, rising labor costs, growing property improvement plan requirements, and differences in buyer and seller pricing expectations have contributed to slower transaction activity. These factors have reduced liquidity and extended underwriting timelines across much of the lodging investment market.

Nevertheless, hotels located near Disneyland Resort and the Anaheim Convention Center continue to command a significant premium due to their irreplaceable locations and durable demand generators. The combination of year-round leisure visitation, convention activity, and long-term tourism growth supports continued investor interest whenever acquisition opportunities arise.

The Disneyland submarket remains one of Orange County's most important hotel investment corridors and accounts for a significant share of cumulative countywide transaction volume. Looking ahead, transaction activity is expected to remain selective, though long-term investor interest should continue to be supported by future resort expansion, major regional events, limited supply growth, and the market's strong barriers to entry.

Against this backdrop, limited recent market activity and prevailing pricing metrics further illustrate the Disneyland investment environment.

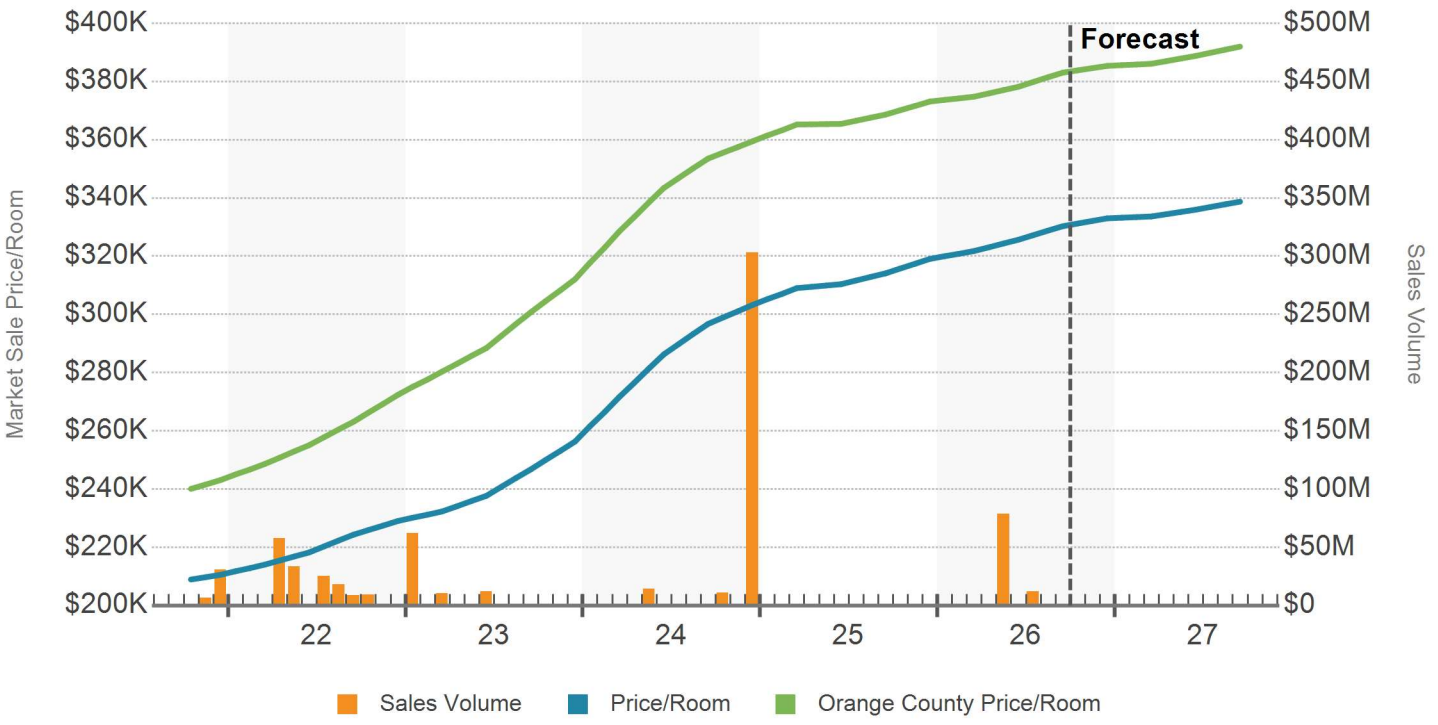

In the past 12 months, 3 hotels traded in Disneyland, for a transaction volume of $90.8 million. This compares to the three-year annual sales volume average of $133 million.

Sales involving Luxury & Upper Upscale accounted for $0.00 in sales volume over the past 12 months, Upscale & Upper Midscale had $78.8 million worth of transactions, and trades involving Midscale & Economy assets accounted for $12.1 million over the same period.

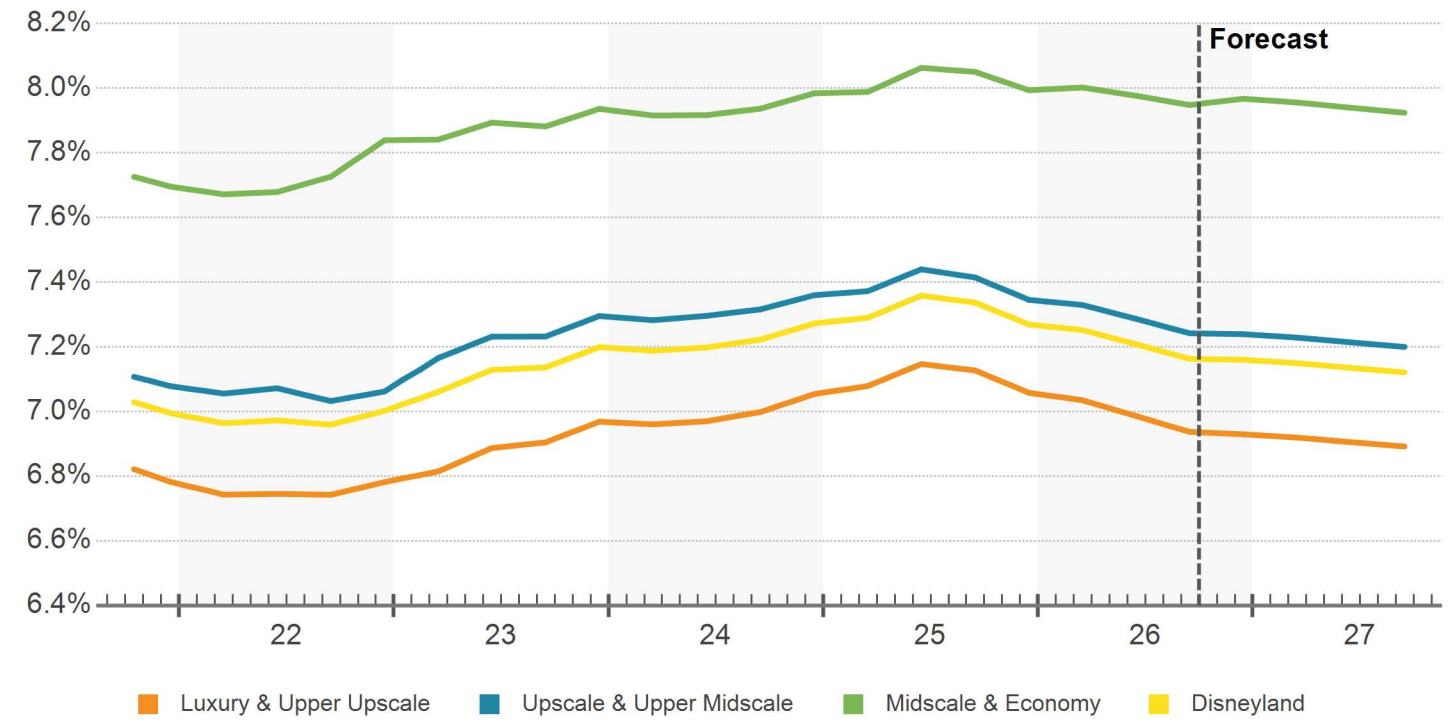

The market cap rate, or the estimated cap rate for the market, stands at 7.2% compared to the Orange County average of 7.3%.
