LODGING ANALYTICS RESEARCH & CONSULTING

MARKET INTELLIGENCE REPORT

Visit Anaheim

JANUARY 2026

Visit Anaheim - Anaheim & Garden Grove Sets

Anaheim Market Overview: In 2025, despite a soft U.S. consumer and inbound international demand, soft comparisons drove operating fundamentals modestly higher. In 2026, a strong convention calendar (up 22% YoY) and major events in nearby Los Angeles County will support leisure demand and pricing power, even as occupancy moderates slightly.

- Tourism and entertainment play a central role in the area, with 2024 being a record-breaking year of 26.3 million visitors to the city of Anaheim.
- Pricing power will be supported by strong absolute occupancy levels, which will remain just below 70% through 2030.

Visit Anaheim - Anaheim Overview: Moving forward, growth will be muted by lackluster economic growth and a weakening consumer, and despite overall strength in convention center bookings, demand and therefore occupancy will moderate through 2030. However, nearby special events (Super Bowl, World Cup, Summer Olympics) will aid pricing power and RevPAR growth, while supply growth remains benign. Over the next five years, RevPAR will increase at a 1.7% CAGR, driven by a 2.9% ADR CAGR but a (1.2)% occupancy CAGR.

Visit Anaheim - Anaheim Forecast Highlights

- The most recent hotel opened in 2023. There are currently no hotels under construction, and over the next five years, we expect supply to slightly decrease with a (0.3)% CAGR, due to recent hotel closures.
- Demand levels will moderate throughout our forecast, despite being aided by special events and the convention calendar. Through 2030, demand will decrease at a (1.5)% CAGR.
- Despite no supply growth, waning demand levels will drive occupancy to remain around 73/74% through 2028, before drifting lower through the rest of our forecast. Through 2030, occupancy will decline at a (1.2)% CAGR.
- Stronger ADR growth will resume in 2026, although pricing power will weaken slightly in the later forecast years, due to lackluster economic growth and moderating occupancy. Through 2030, ADR will grow at a 2.9% CAGR.
- RevPAR growth will resume in 2026 and will gain momentum throughout 2027 before growth begins to moderate thereafter. RevPAR will increase at a 1.7% CAGR through 2030.
- Over the next five years, the RevPAR penetration index of the *Visit Anaheim – Anaheim* set to the broader Anaheim market will average 113%, which is below the 116% penetration level experienced in 2025 but well above the long-run average of 107%.

Visit Anaheim – Garden Grove Overview: Following a challenging 2025, growth will improve due to a better convention calendar and an improving consumer. Additionally, nearby special events (World Cup, Super Bowl) will be a tailwind in the near term. In 2027 with tough comparisons to those events, growth will slow before reaccelerating afterwards, and RevPAR will increase at a 2.6% CAGR, driven by a 2.5% ADR CAGR and a 0.1% occupancy CAGR.

Visit Anaheim – Garden Grove Forecast Highlights

- The only hotel to open since 2020 opened in 2023. There are no hotels currently under construction and over the next five years, we expect supply to increase at a 1.0% CAGR.
- Demand growth will resume in 2026 after demand declined in 2025, and it will mostly offset accelerating supply growth in the later years of our forecast, aside from in 2030. Through 2030, demand will grow at a 1.1% CAGR.
- Occupancy declined in 2025, but growth will resume briefly in 2026. Occupancy will stabilize around 71% through 2029, before declining in 2030. Through 2030, occupancy will increase at a 0.1% CAGR.
- After declining in 2025, ADR growth will resume in 2026, before moderating in 2027 with declining occupancy. After 2027, ADR growth will reaccelerate. Through 2030, ADR will grow at a 2.5% CAGR.
- RevPAR growth will accelerate through mid-2026, boosted by special events and a strong convention calendar, before growth decelerates in late 2026 and early 2027. Thereafter, ADR growth will drive RevPAR growth. Through 2030, RevPAR will increase at a 2.6% CAGR.
- Over the next five years, the RevPAR penetration index of the *Visit Anaheim – Garden Grove* set to the broader Anaheim market will average 73%, which is slightly below the 74% penetration level experienced in 2025 and well below the long-run average of 85%.

National Forecast Backdrop

Uncertainty Persists

U.S. economic uncertainty is fueled by a confluence of factors. From a positive perspective, the stock market continues to hover around all-time highs, as does the Case Shiller home price index. These dynamics have boosted the top 10% of U.S. household's balance sheets, which account for about half of total U.S. consumer spending. As a result, 2Q-2025 GDP increased 3.8%. While 3Q-2025 GDP results have been delayed, Moody's Analytics estimates a 2.8% increase in the quarter, suggesting continued economic strength.

However, the remaining 90% of households are struggling. Sluggish wage growth at lower income levels coupled with rising inflation and a soft job market have combined to drive many Americans to struggle financially. Financial stress is elevated for lower-income households, with 29% living paycheck-to-paycheck and a record 6.7% of subprime auto loans delinquent. Limited wage growth is at least partly due to a soft job market. Between July and September 2025, U.S. employment declined by 5,000 jobs, excluding the healthcare sector.

As a result, Consumer Sentiment troughed in May at the lowest level since the depths of the pandemic. While it bounced back shortly thereafter, it began to drift lower again in August, and the October reading of 53.6 was at similarly low levels.

Nonetheless, as of October, only 33% of the economists surveyed by the Wall Street Journal expect the U.S. to enter a recession over the next twelve months. However, economic growth is increasingly driven by the top U.S. households rather than broad-based growth. This fact makes economic growth more unstable, which is exacerbated by economic policy uncertainty, driven by:

- Risk of another federal government shutdown in January;
- Tariff uncertainty; and,
- Trump's incendiary rhetoric.

With this backdrop, we expect domestic leisure travel to remain sluggish into 2026; however, these leisure headwinds are skewed away from the high-end leisure traveler. Corporate transient demand will also remain soft into 2026, but group trends are proving more resilient. We estimate that the U.S. convention center booking pace is up 4% on a year-over-year basis in 2025, following the 3% increase in 2024. The convention booking pace is up another 6% year-over-year in 2026.

This macro-economic backdrop, coupled with waning inbound foreign arrivals, is likely to weigh on lodging fundamentals for several quarters. Negative sentiment toward the U.S. has fueled a (4)% decline in inbound foreign travel year-to-date (October). However, that decline will reverse next year as sentiment improves and the U.S. hosts the World Cup. We estimate that the World Cup events alone could boost 2026 U.S. RevPAR by almost 2%, primarily through ADR growth.

Moody's Analytics economic forecasts incorporate the following key national assumptions that drive our outlook:

- The Fed will cut the target Fed Funds Rate by 25 bps in December and continue to gradually reduce the target rate through 1Q-2027.
- U.S. GDP will increase 1.1% in the fourth quarter, 1.9% in 2025 and 1.7% in 2026.

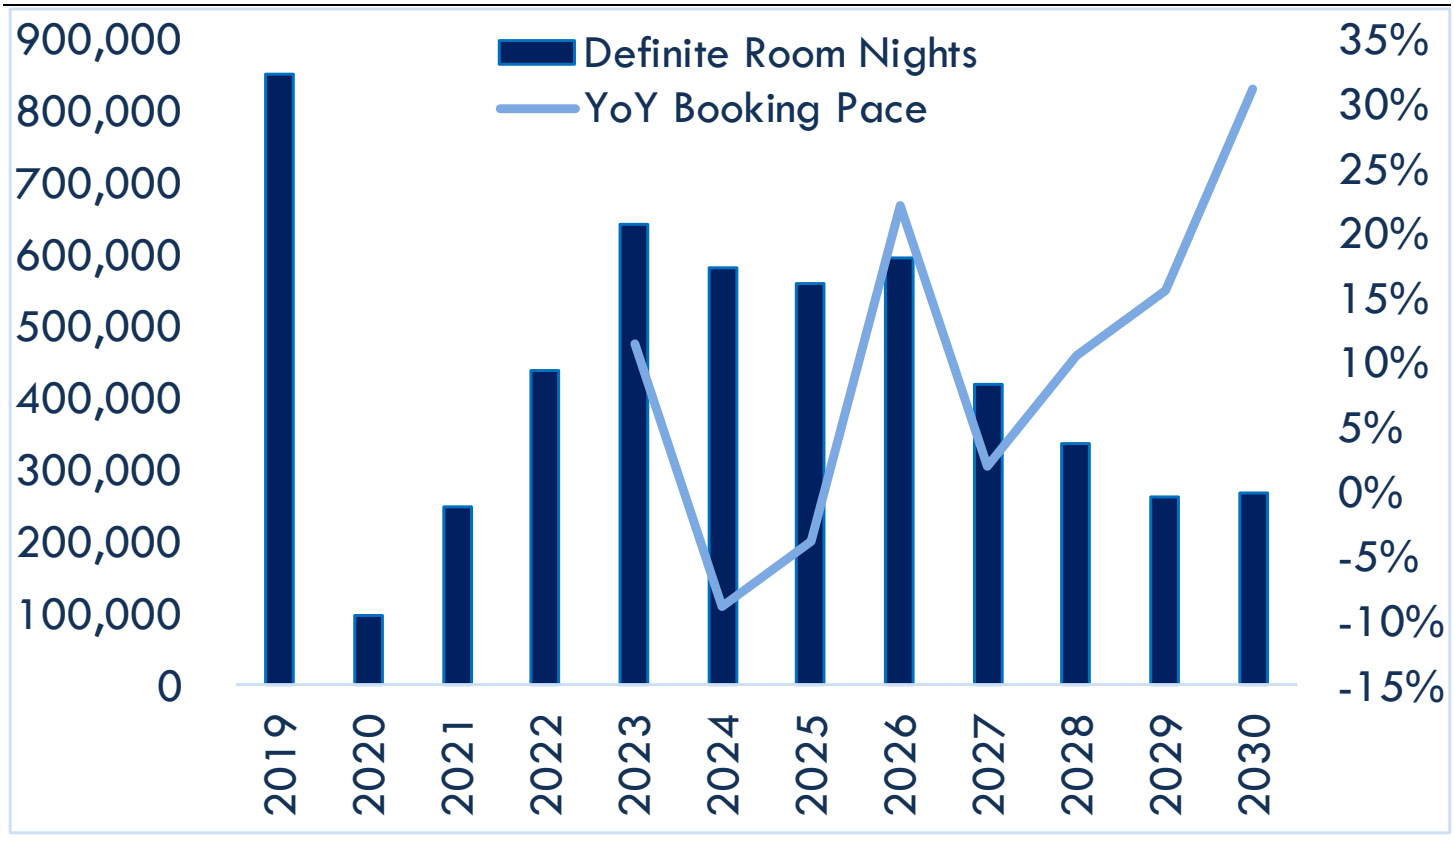

As such, we forecast 2025 RevPAR to decrease (0.5)%, driven by a 0.9% ADR increase and a (1.4)% occupancy decline. For 2026, RevPAR will increase 1.2%, driven by a 2.1% ADR increase and a (0.9)% decline in occupancy.

Convention Center

The Anaheim Convention Center features 1.15 million square feet of exhibit space and 352,000 square feet of meeting space, making it one of the largest convention centers on the West Coast. Given the size of the facility, it can have a meaningful impact on local hotel operating performance.

Moving forward, the recovery in convention trends will be a primary driver of the lodging industry. In 2025, Anaheim's definite room nights tied to the convention center were down 4% from 2024. Bookings are pacing up 22% year-over-year in 2026 before the pace moderates in 2027 when it is up only 2% year-over-year. The pace rebounds in 2028, up 11% year-over-year, and this trend continues with booking pace remaining elevated through 2030. In fact, 2029 is pacing currently 6% above 2019 levels, and 2030 is pacing 39% above 2019 levels.

Convention Center Bookings *(as of 1Q-2026)*

Source: Lodging Analytics Research & Consulting

The Anaheim Convention Center completed a $190 million expansion in 2017 that added over 200,000 square feet to the facility. There are currently no additional expansion plans; however, the 618-room Westin Anaheim Resort opened near the convention center in June 2021, offering an additional 48,000 square feet of meeting space.

Lodging Supply

Supply growth across the Visit Anaheim – Anaheim set has been somewhat active over the last few years. There have been nine hotels in the Visit Anaheim – Anaheim set to open since 2019, for a total of 2,509 rooms. The most recent hotel opening was the Villas at Disneyland Hotel in September 2023. These nine hotels represent a supply increase of 12.6% in the Visit Anaheim – Anaheim set room count since 2019. However, the city of Anaheim has now torn down five hotels since 2020, due to initiatives relating to neighborhood revitalization, contributing to slight declines in overall supply. The Kettle Motor Hotel with 27 rooms was demolished in September 2025 but was closed in 2024. The following other motels have closed – Rainbow Inn (42 rooms), acquired in 2024 but demolished in 2025, Anaheim Lodge (45 rooms) acquired in 2022 and demolished in 2024, Covered Wagon (70 rooms) acquired in 2022 and demolished in 2023, and the Americana Motel (44 rooms) acquired in 2019 but demolished in 2021. Further, the Anaheim Extended Suites with 116 rooms, was permanently closed in August 2025 and converted to multifamily.

Moving forward, we expect openings in the Visit Anaheim – Anaheim set to be more muted. Currently, there are no hotels under construction that fall within the Visit Anaheim – Anaheim boundaries. However, there are several in the planning phase of development– but it is uncertain when or if they will develop. With this in mind, we assume fewer than 20% of the rooms currently in planning will open within the next five years.

Visit Anaheim – Anaheim Hotel Developments (All Projects Under Construction, Select Projects in Planning)

Hotels	Zip Code	Rooms	Development Phase	Opening Date	Scales
ocV!BE Hotel 1	92806	275	Planning		Not Yet Determined
ocV!BE Hotel 2	92806	275	Planning		Not Yet Determined

TownePlace Suites by Marriott Anaheim Resort	92802	186	Planning		Upper Midscale
Tribute Portfolio Anaheim Downtown	92802	125	Planning		Upper Upscale
aloft Anaheim	92802	75	Planning		Upscale

Source: BuildCentral, Lodging Analytics Research & Consulting, Costar

The Anaheim market has hotel rooms under construction equivalent to 0.1% of its existing inventory. Additionally, the market has a more elevated number of projects in the planning stage of development, but that still only equates to 9.5% of the existing inventory. The Anaheim submarket, as defined by CoStar, has 0.0% of its existing inventory under construction currently. However, the submarket has more rooms in the planning stage of development which equates to 4.8% of the existing inventory. The Disneyland submarket, as defined by CoStar, also has 0.0% of its existing inventory under construction currently. However, the submarket has many rooms in the planning stage of development which equates to 6.7% of the existing inventory.

The Visit Anaheim – Anaheim set has no rooms under construction currently, but rooms in planning equate to 5.5% of existing inventories. However, the planning metric incorporates many projects which won't ever get developed, so that data point is unreliable. Nonetheless, there is a slight risk of elevated supply growth in the later years of our forecast.

Revenue Forecast Models

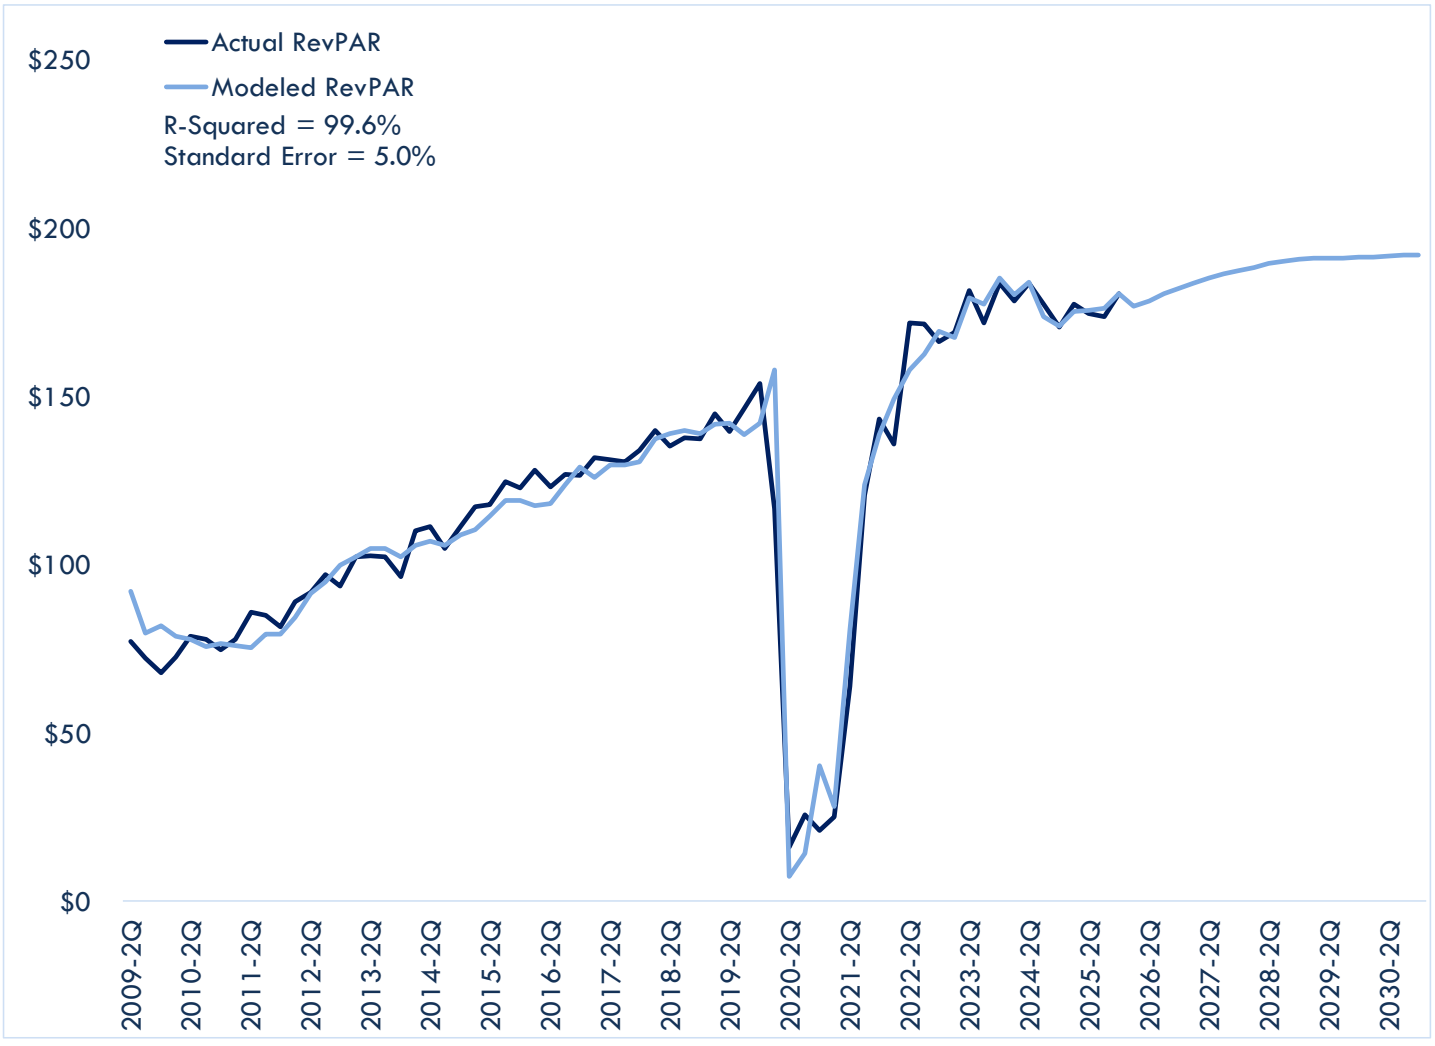

RevPAR Growth Outlook

In addition to supply and convention pacing data, our seasonally adjusted RevPAR model is primarily driven by the following key variables:

- MSA Non-Farm Jobs (81.6% correlation)
- MSA Population (50.8% correlation)
- MSA Consumer Price Index (68.4% correlation)
- U.S. Personal Spending (71.5% correlation)

Based on these variables, along with several others, we have created a regression forecast model that has a 99.6% R-Squared, indicating an extremely high prediction confidence level, within a standard error of 5.0%.

RevPAR, Seasonally Adjusted

ADR Growth Outlook

In addition to supply and convention pacing data, our seasonally adjusted ADR model is primarily driven by the following key variables:

- MSA Non-Farm Jobs (86.2% correlation)
- MSA Population (54.2% correlation)
- MSA Consumer Price Index (85.2% correlation)
- U.S. Personal Spending (86.9% correlation)

Based on these variables and a few others, we have created a regression forecast model that has a 98.2% R-Squared, indicating an extremely high prediction confidence level, within a standard error of 2.9%.

Occupancy Growth Outlook

Using our RevPAR and ADR growth outlooks we derive our occupancy outlook. Using our Supply growth forecast as well, we back into our demand growth outlook. Detailed Supply, demand, occupancy, RevPAR, and ADR forecasts by quarter and by year through 2030 are available on page 6 and by month on page 9.

Outlook for Primary Macro-Economic Drivers of our Visit Anaheim – Anaheim Models

Aside from Visit Anaheim convention pace data, the primary drivers of our Visit Anaheim – Anaheim forecast models include MSA Non-Farm Jobs, MSA Population, and MSA Consumer Price Index, as well as national factors that impact leisure demand, such as the U.S. Personal Spending. There are other factors that we incorporate into our models, but their impact is less meaningful than these drivers.

Most local MSA factors will underperform national averages over the next five years. Anaheim non-farm jobs are expected to grow at a slower pace than the national average over our entire forecast period, aside from 2026. Anaheim population is expected to remain stable overall, but will modestly decline in the later years, while the overall U.S. population grows. Anaheim CPI will grow faster than overall national figures. U.S. Personal Spending growth won't exceed 2% until 2029. The confluence of these factors should support growth for the Visit Anaheim – Anaheim hotel fundamentals moving forward.

Outlook for Primary Macro-Economic Drivers in Anaheim MSA

Lodging Supply

Supply growth across the Visit Anaheim – Garden Grove set has been somewhat muted over the last few years. There has been only one hotel in the Visit Anaheim – Garden Grove set to open since 2019, for a total of 124 rooms. The hotel was a Home2 Suites by Hilton Garden Grove Anaheim that opened in August 2023. This hotel represents a supply increase of just 2.9% in the Visit Anaheim – Garden Grove set room count since 2019.

Visit Anaheim – Garden Grove Recent Openings

Hotel	Zip Code	Submarket	Rooms	Opening Date
Home2 Suites by Hilton Garden Grove Anaheim	92843	Anaheim	124	August-23

Source: BuildCentral, Lodging Analytics Research & Consulting, Costar

Moving forward, we expect openings in the Visit Anaheim – Garden Grove set to remain muted. Currently, there are no hotels under construction that fall in the Visit Anaheim – Garden Grove boundaries. However, there are several in the planning phase of development– but it is uncertain when or if they will develop. With this in mind, we assume fewer than 20% of the rooms currently in planning will open within the next five years.

Visit Anaheim – Garden Grove Hotel Developments (All Projects Under Construction, Select Projects in Planning)

Hotels	Zip Code	Rooms	Development Phase	Opening Date	Scales
Le Meridien Orange County	92840	400	Planning		Upper Upscale
Kimpton Garden Grove Anaheim	92840	371	Planning		Upper Upscale
Grove District Resort Hotel Three	92840	250	Planning		Not Yet Determined
12801 Brookhurst Street Hotel	92840	75	Planning		Not Yet Determined

Source: BuildCentral, Lodging Analytics Research & Consulting, Costar

The Anaheim market has hotel rooms under construction equivalent to 0.1% of its existing inventory. Additionally, the market has a more elevated number of projects in the planning stage of development, but still only equates to 9.5% of the existing inventory. The Anaheim submarket, as defined by CoStar, has 0.0% of its existing inventory under construction currently. However, the submarket has more rooms in the planning stage of development which equates to 4.8% of the existing inventory. The Disneyland submarket, as defined by CoStar, also has 0.0% of its existing inventory under construction currently. However, the submarket has many rooms in the planning stage of development which equates to 6.7% of the existing inventory.

The Visit Anaheim – Garden Grove set has 0.0% of its existing inventory under construction currently, but rooms in planning equate to 24.8% of existing inventories. However, the planning metric incorporates many projects which won't ever get developed, so that data point is unreliable. Nonetheless, there is a slight risk of elevated supply growth in the later years of our forecast.

Revenue Forecast Models

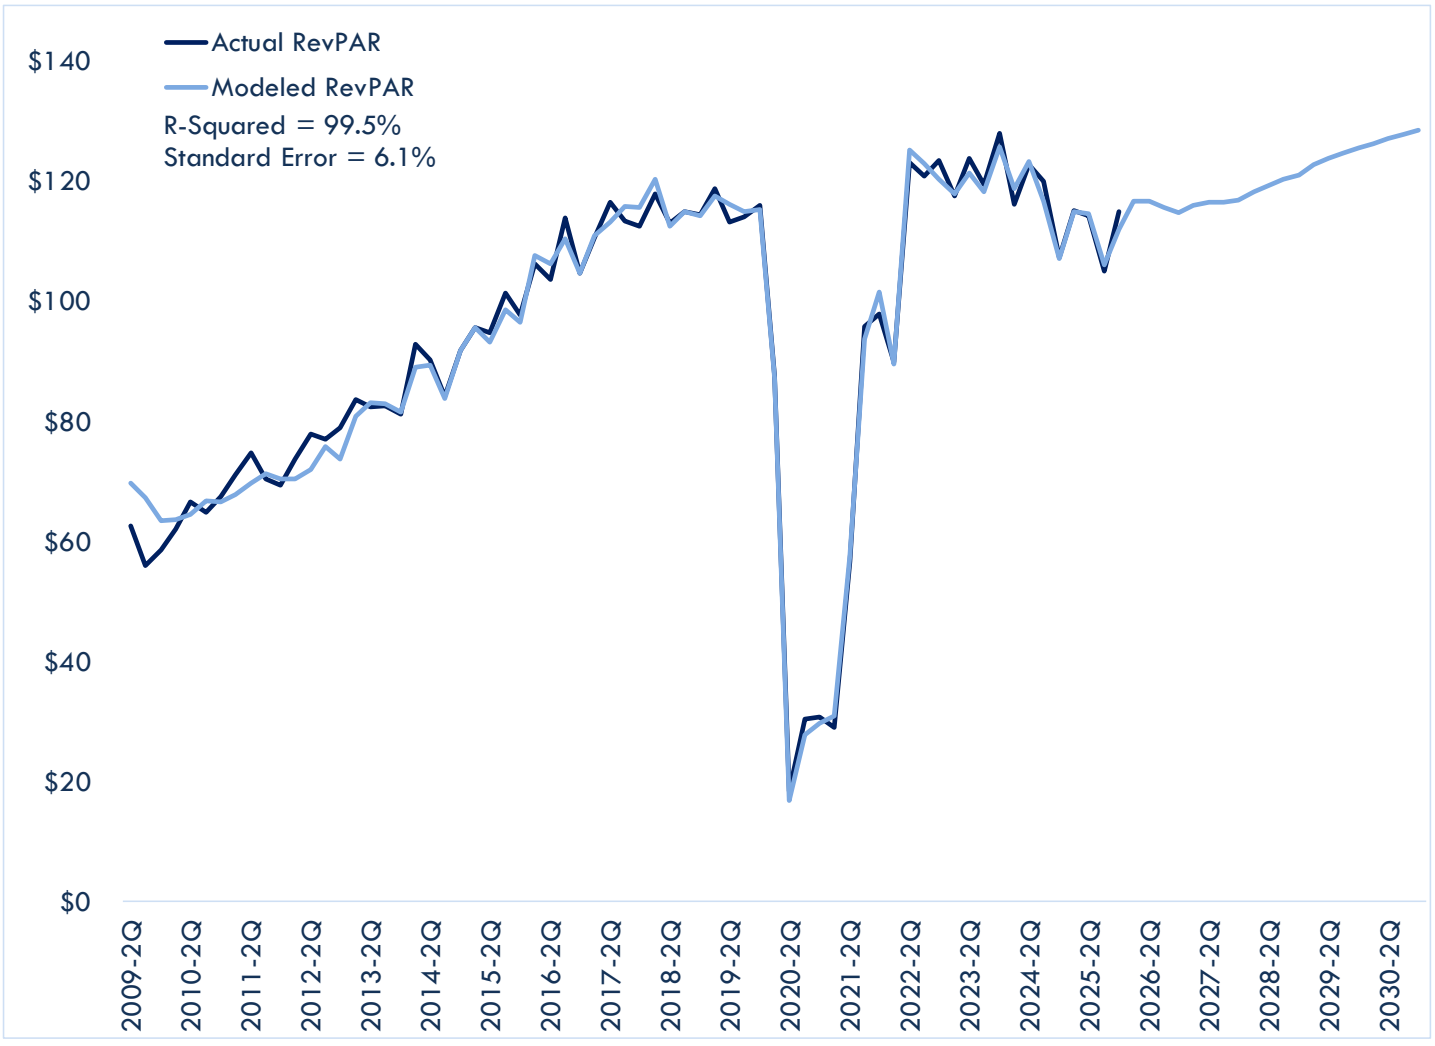

RevPAR Growth Outlook

In addition to supply and convention center pacing data, our seasonally adjusted RevPAR model is primarily driven by the following key variables:

- MSA Unemployment Rate (-89.3% correlation)
- U.S. Personal Savings Rate (-45.0% correlation)

Based on these variables, along with several others, we have created a regression forecast model that has a 99.5% R-Squared, indicating an extremely high prediction confidence level, within a standard error of 6.1%.

RevPAR, Seasonally Adjusted

Source: Lodging Analytics Research & Consulting, Visit Anaheim

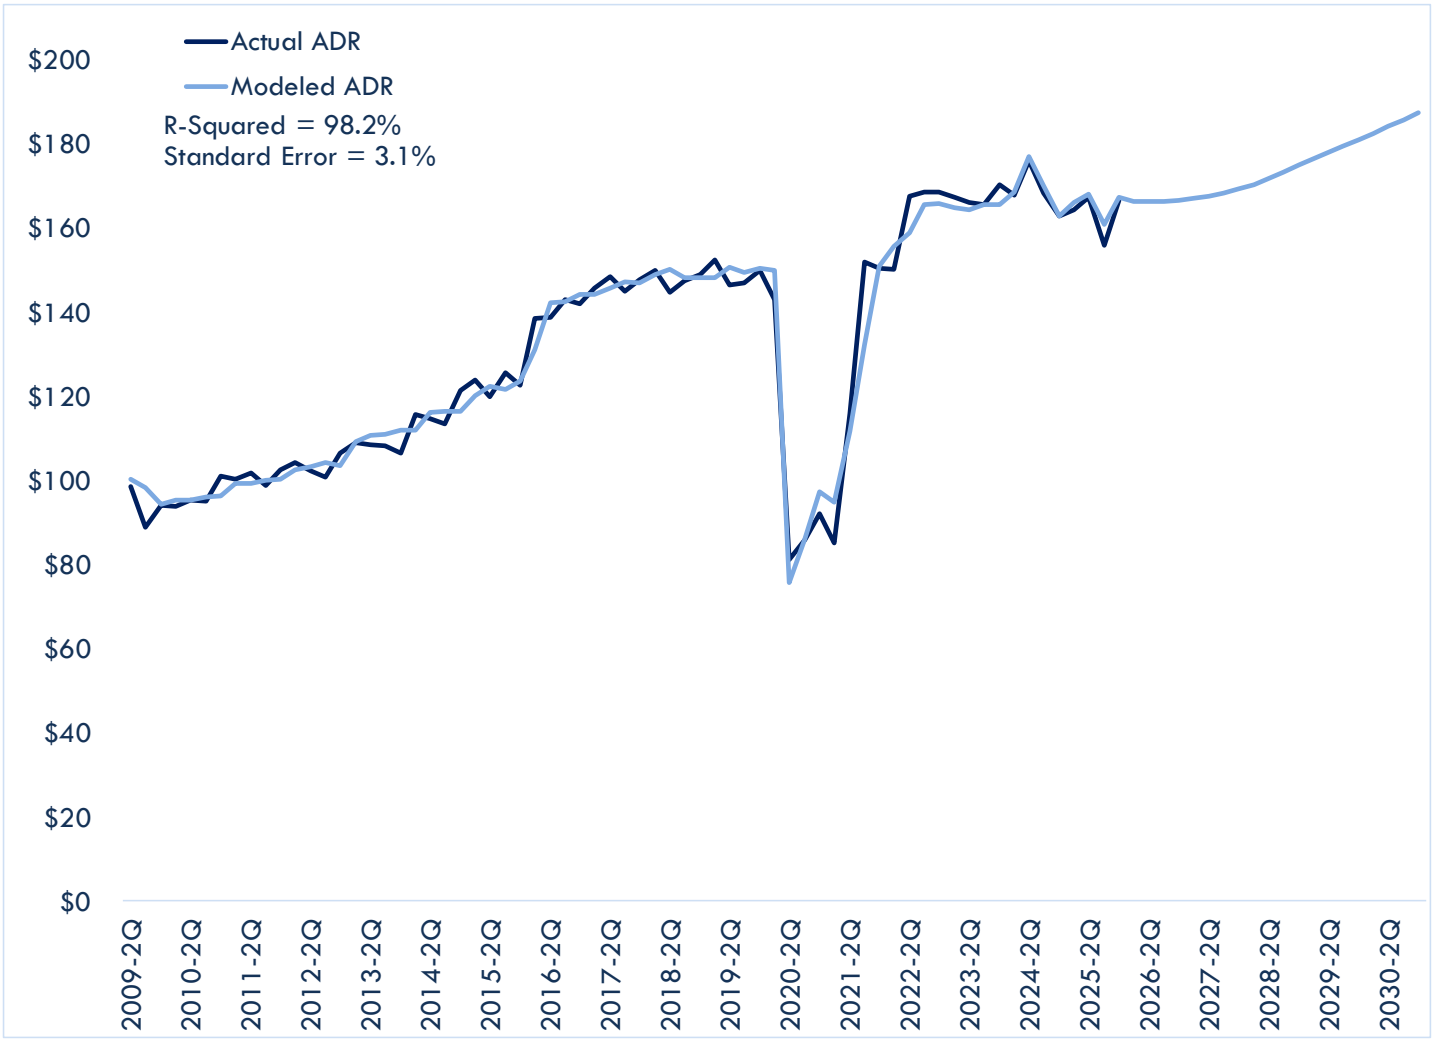

ADR Growth Outlook

In addition to supply and convention center pacing data, our seasonally adjusted ADR model is primarily driven by the following key variables:

- MSA Unemployment Rate (-87.6% correlation)
- MSA Consumer Price Index (75.0% correlation)
- MSA Population (65.8% correlation)
- U.S. Personal Savings Rate (-17.3% correlation)

Based on these variables and a few others, we have created a regression forecast model that has a 98.2% R-Squared, indicating an extremely high prediction confidence level, within a standard error of 3.1%.

Occupancy Growth Outlook

Using our RevPAR and ADR growth outlooks we derive our occupancy outlook. Using our Supply growth forecast as well, we back into our demand growth outlook. Detailed Supply, demand, occupancy, RevPAR, and ADR forecasts by quarter and by year through 2030 are available on page 17 and by month on page 20.

Outlook for Primary Macro-Economic Drivers of our Visit Anaheim – Garden Grove Models

Aside from Visit Anaheim convention pace data, the primary drivers of our Visit Anaheim – Garden Grove forecast models include MSA Unemployment Rate, MSA Population, and MSA Consumer Price Index, as well as national factors that impact leisure demand, such as the U.S. Personal Savings Rate. There are other factors, including Visit Anaheim – Garden Grove Supply, that we incorporate into our models, but their impact is less meaningful than these drivers.

Most local MSA factors will outperform national averages over the next five years. The Anaheim unemployment rate is expected to fall faster than the national average annually and will outperform meaningfully through 2028. Anaheim population is expected to remain stable overall, but will modestly decline in the later years, while the overall U.S. population grows. Anaheim CPI will grow faster than overall national figures. U.S. Personal Savings will increase substantially through 2027, and growth will remain above 5% yearly afterwards. This should provide a headwind for domestic leisure travel in 2026 and 2027, as people opt to save rather than spend on travel. The confluence of these factors should support growth for the Visit Anaheim – Garden Grove hotel fundamentals moving forward.

Outlook for Primary Macro-Economic Drivers in Anaheim

	Unemployment Rate	Population	CPI	U.S. Personal Savings
