LODGING ANALYTICS RESEARCH & CONSULTING

# MARKET INTELLIGENCE REPORT

# Visit Anaheim

JULY 2026

# Visit Anaheim - Anaheim & Garden Grove Sets

**Anaheim Market Overview: In 2026, a strong convention calendar (up 12% YoY) and the World Cup nearby will support demand growth and pricing power, while occupancy is aided by recent supply declines. Thereafter, generally strong convention pacing and muted supply growth will support pricing power, despite lackluster economic growth, which will limit demand growth and modestly pressure occupancy.**

- Tourism and entertainment play a central role in the area, with 2025 being another record-breaking year with 26.5 million visitors to the city of Anaheim.

**Visit Anaheim - Anaheim Overview: In 2026, fundamentals will experience strong growth largely due to the World Cup, and the convention calendar (up 12% YoY). Afterward, with strong convention center bookings, pricing power will remain relatively strong but occupancy will decline due to lackluster economic growth and a soft consumer. Nearby special events (World Cup, Summer Olympics) will aid pricing power and RevPAR growth. Through 2030, RevPAR will increase at a 2.3% CAGR, driven by a 3.4% ADR CAGR but a (1.1)% occupancy CAGR.**

**Visit Anaheim - Anaheim Forecast Highlights**

- The most recent hotel opened in 2023. There is currently only one hotel under construction, and over the next five years, we expect supply to slightly decrease with a (0.1)% CAGR, due to recent hotel closures.
- Demand levels will moderate throughout most of our forecast, outside of years aided by spillover from nearby special events and the strong convention calendar (2026 and 2028). The declines are primarily tied to declining corporate transient demand, which will be limited by muted job growth and the expansion of artificial intelligence. Through 2030, demand will decrease at a (1.2)% CAGR.
- Waning demand will drive occupancy lower beginning in late 2026, and will decline annually outside of 2028, when the Summer Olympics are nearby. Through 2030, occupancy will decline at a (1.1)% CAGR.
- Stronger ADR growth has resumed in 2026, and despite moderating occupancy, pricing power will remain strong through 2028, aided by nearby special events and the convention calendar. Through 2030, ADR will grow at a 3.4% CAGR.
- RevPAR growth has resumed in 2026 but will soften in 2027, before accelerating in 2028 due to run-off demand from the nearby Summer Olympics. Then, growth will soften, and through 2030, RevPAR will increase at a 2.3% CAGR.
- Over the next five years, the RevPAR penetration index of the *Visit Anaheim – Anaheim* set to the broader Anaheim market will average 111%, which is below the 117% penetration level experienced in 2025 but above the long-run average of 107%.

**Visit Anaheim – Garden Grove Overview: Thus far in 2026, fundamentals have improved due to a better convention calendar, the World Cup, and an improving consumer. Moving forward, nearby special events will continue to be a tailwind. In 2027, with tough comparisons to the World Cup, RevPAR growth will slow before reaccelerating afterwards, and RevPAR will increase at a 3.2% CAGR, driven by a 3.2% ADR CAGR and a 0.0% occupancy CAGR.**

**Visit Anaheim – Garden Grove Forecast Highlights**

- Only one hotel has opened in the market over the past five years and here are no hotels currently under construction. Over the next five years, we expect supply to increase at a 1.4% CAGR, fueled by projects currently in Planning.
- After demand declined in 2025, growth has resumed in 2026 and will persist throughout our forecast outside of a period of difficult comparisons in early 2027. Through 2030, demand will grow at a 1.4% CAGR.
- After declines in 2025, occupancy has experienced significant growth thus far in 2026, fueled by the World Cup, but is expected to decline through the rest of the forecast. Through 2030, occupancy will be flat with a 0.0% CAGR.
- ADR growth resumed in 2026 and will accelerate through 2029. Through 2030, ADR will grow at a 3.2% CAGR.
- RevPAR growth has accelerated in 2026, boosted by special events and a strong convention calendar. Then, due to tough comparisons, RevPAR will decline through mid-2027. Thereafter, RevPAR growth will reaccelerate, driven primarily by ADR growth. Through 2030, RevPAR will increase at a 3.2% CAGR.
- Over the next five years, the RevPAR penetration index of the *Visit Anaheim – Garden Grove* set to the broader Anaheim market will average 70%, which is below the 75% penetration level experienced in 2025 and well below the long-run average of 85%.

# National Forecast Backdrop

**Revenge Travel 2.0 or an Oscillating Operating Environment?**

U.S. hotel performance in 1Q-2026 dramatically exceeded expectations, with RevPAR increasing 3.8%, driven by gains in both occupancy and ADR. This improvement was realized despite the war with Iran, a partial government shutdown, several mass layoffs, rising gas prices, inflation, and the impact from the Trump Administration's tariffs. While it is difficult to pinpoint the specific drivers of the outperformance, they may be tied to the following factors:

- SALT tax relief benefits materializing early.
- Pent up leisure demand after limited summer leisure travel in 2025.
- The pull forward of leisure travel from summer 2026 due to expectations for rising gas prices and airfares due to the war with Iran.
- Corporate travel stability as companies appear to be less focused on the impact of uncertainty tied to the Trump Administration's policies and frequent shifts. Instead, corporations are fixated on the impact of AI on their businesses.

Overall, in 1Q-2026, Real GDP increased 2.0%, but it is being heavily impacted by the spending of the top tier of households. The stock market continues to hover around all-time highs, as does the Case Shiller home price index. These dynamics have boosted the top 20% of U.S. households' balance sheets, which now account for almost two-thirds of total U.S. consumer spending.

However, the remaining 80% of households are struggling. Financial stress is elevated for lower-income households, with delinquencies tied to student loans, first mortgages, auto loans, and credit cards at or around post-pandemic highs. This financial stress is at least partly tied to lower wage growth which is influenced by a weak job market. Those issues are expected to be compounded by record oil and gas prices that have yet to fully be reflected on consumer's balance sheets. Nonetheless, as of April, only 33% of the economists surveyed by the Wall Street Journal anticipate the U.S. to enter recession over the next twelve months.

Additionally, business spending is skewing toward investment in artificial intelligence (AI). Excluding projections for AI investment, business investment is expected to be roughly flat in 2026 and 2027.

With that backdrop, our outlook for hotel performance is driven by a combination of tailwinds and headwinds:

**Tailwinds**

- Comparisons begin to ease in 2Q-2026.
- The World Cup should have a material impact to annual RevPAR growth across the U.S., skewed toward host cities.
- SALT tax relief is hitting the consumer balance sheet, which should result in an added capacity for spending.
- The high-end leisure traveler will continue to be strong, supported by a robust stock market, increasing wealth levels, and an increased propensity to travel domestically considering the Iran war.
- Group demand will continue to be strong, with convention bookings pacing up 4% year-over-year in 2026 and another 1% in 2027.

**Headwinds**

- The War with Iran has caused a spike in oil prices which has translated into increased gas prices and airfares, driving travel costs much higher.
- Muted job growth and traditional business investment will limit leisure travel demand from most Americans as well as business travel demand.
- Sentiment toward the U.S. is increasingly negative and without a shift in rhetoric, could limit the benefit of the World Cup. Through March, on a TTM basis, inbound international arrivals declined 4%.

Additionally, Moody's Analytics economic forecasts incorporate the following key national assumptions that drive our outlook:

- The Fed will keep rates unchanged until December 2026, when the Fed Funds Rate is cut by 25 bps.
- U.S. GDP will increase 1.6% in the second quarter, 2.3% in 2026 and 1.7% in 2027.

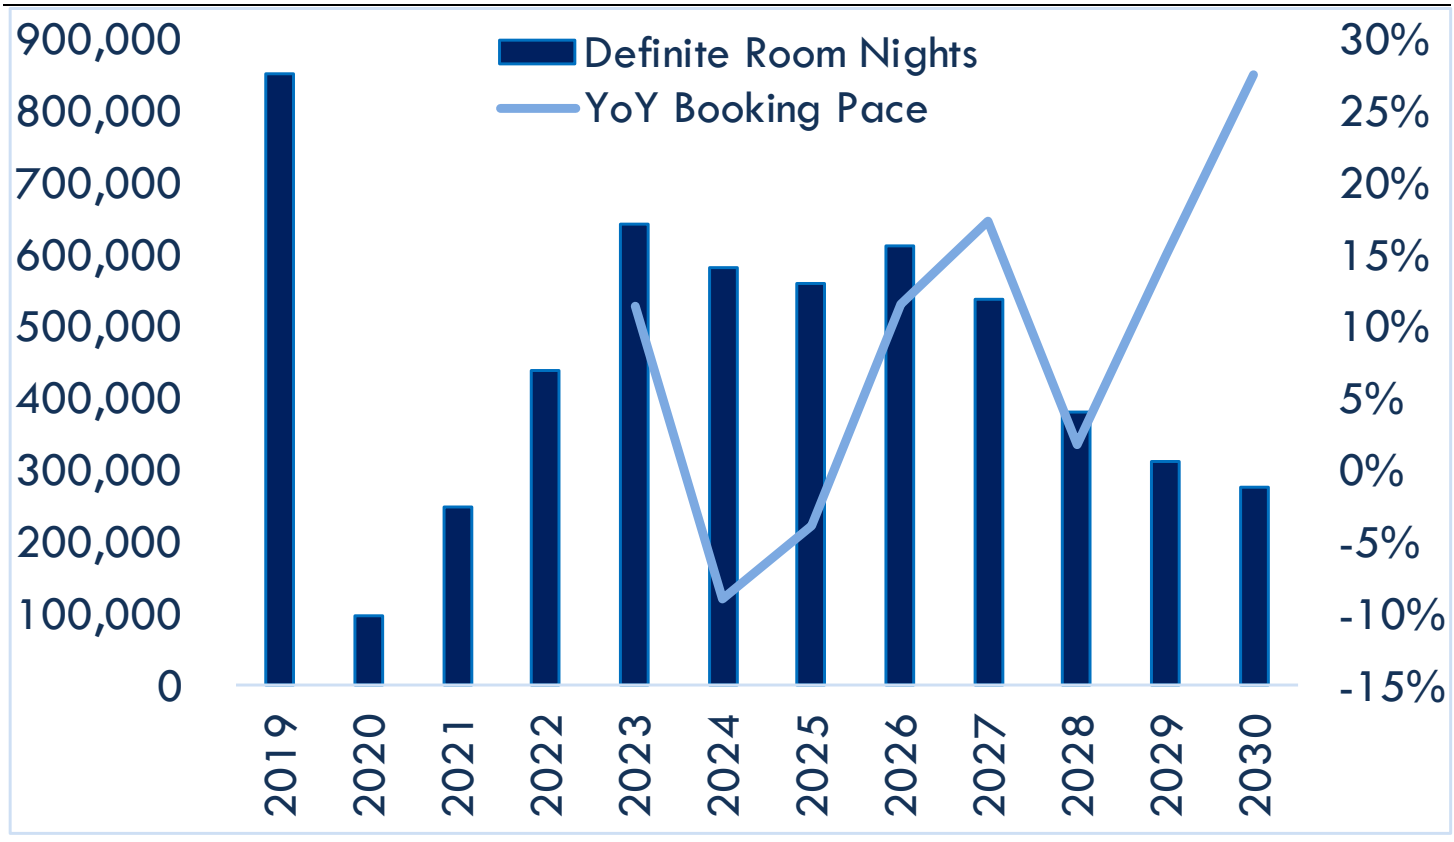

With that backdrop, we forecast 2026 RevPAR to increase 3.4%, driven entirely by a 3.4% ADR increase.

## Convention Center

The Anaheim Convention Center features 1.15 million square feet of exhibit space and 352,000 square feet of meeting space, making it one of the largest convention centers on the West Coast. Given the size of the facility, it can have a meaningful impact on local hotel operating performance.

Moving forward, convention trends will be a primary driver of the lodging industry. In 2025, Anaheim's definite room nights tied to the convention center were down (4)% from 2024, representing slight improvement following the (9)% year-over-year decline in 2024. Bookings are pacing up 12% year-over-year in 2026 and another 17% in 2027 before the pace is only up slightly in 2028, up 2% year-over-year. The pace rebounds in 2029, up 15% year-over-year, and this trend continues with booking pace remaining elevated through 2030. In fact, 2029 is currently pacing 2% above 2019 levels, and 2030 is pacing 30% above 2019 levels.

**Convention Center Bookings** *(as of 3Q-2026)*

Source: Lodging Analytics Research & Consulting

The Anaheim Convention Center completed a $190 million expansion in 2017 that added over 200,000 square feet to the facility. There are currently no additional expansion plans; however, the 618-room Westin Anaheim Resort opened near the convention center in June 2021, offering an additional 48,000 square feet of meeting space.

# Lodging Supply

Supply growth across the Visit Anaheim – Anaheim set has been relatively muted since 2022. Only one hotel in the Visit Anaheim – Anaheim set has opened since 2022, for a total of 350 rooms. This one hotel represents a supply increase of 1.8% in the Visit Anaheim – Anaheim set room count since then. However, multiple hotels have permanently closed across the market in the last few years. Since 2020, nine hotels have closed for a total of 825 rooms, including most recently, the 116-room Anaheim Extended Suites, which permanently closed in August 2025 for conversion to multifamily.

**Visit Anaheim – Anaheim Recent Openings**

| Hotel | Zip Code | Submarket | Rooms | Opening Date |
|---|---|---|---|---|
| Villas at Disneyland Hotel | 92802 | Disneyland | 350 | September-23 |

Source: BuildCentral, Lodging Analytics Research & Consulting, Costar

Moving forward, we expect openings in the Visit Anaheim – Anaheim set to remain muted. Currently, there is only one hotel under construction that falls within the Visit Anaheim – Anaheim boundaries, the Roadhouse Tribute Portfolio Anaheim Downtown with 125 rooms, expected to open in early 2027. However, there are several in the planning phase of development but it is uncertain when or if they will develop. With this in mind, we assume fewer than 20% of the rooms currently in planning will open within the next five years.

**Visit Anaheim – Anaheim Hotel Developments (All Projects Under Construction, Select Projects in Planning)**

| Hotels | Zip Code | Rooms | Development Phase | Opening Date | Scales |
|---|---|---|---|---|---|
| Roadhouse Tribute Portfolio Anaheim Downtown | 92802 | 125 | Construction | 1Q-2027 | Upper Upscale |
| ocV!BE Arena Hotel | 92806 | 320 | Planning | | Not Yet Determined |
| ocV!BE Meadow Hotel | 92806 | 230 | Planning | | Not Yet Determined |
| TownePlace Suites by Marriott Anaheim Resort | 92802 | 186 | Planning | | Upper Midscale |

Source: BuildCentral, Lodging Analytics Research & Consulting, Costar

The broader Anaheim market has hotel rooms under construction equivalent to 0.3% of its existing inventory. Additionally, the market has a more elevated number of projects in the planning stage of development, but that still only equates to 8.8% of the existing inventory. The Anaheim submarket, as defined by CoStar, has 0.0% of its existing inventory under construction currently. However, the submarket has more rooms in the planning stage of development which equates to 2.7% of the existing inventory. The Disneyland submarket, as defined by CoStar, has 0.6% of its existing inventory under construction currently However, the submarket has many rooms in the planning stage of development which equates to 5.7% of the existing inventory.

The Visit Anaheim – Anaheim set has 0.6% of its existing inventory under construction currently, but rooms in planning equate to 3.4% of existing inventories. However, the planning metric incorporates many projects which won't ever get developed, so that data point is unreliable. Nonetheless, there is a slight risk of elevated supply growth in the later years of our forecast.

# Revenue Forecast Models

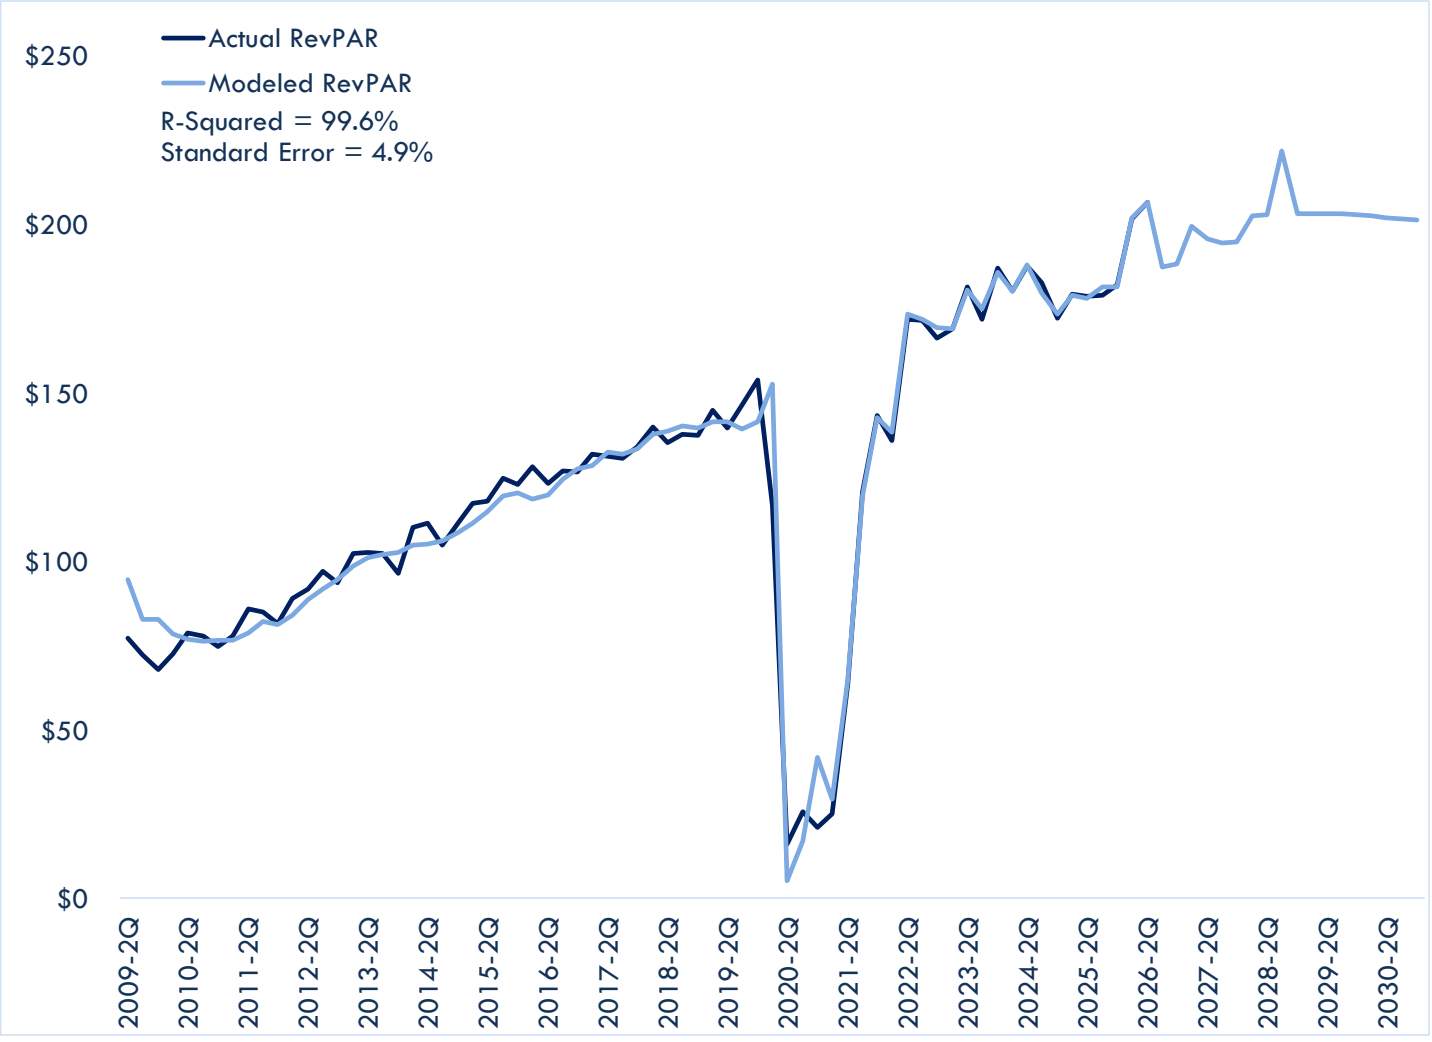

**RevPAR Growth Outlook**

In addition to supply and convention pacing data, our seasonally adjusted RevPAR model is primarily driven by the following key variables:

- MSA Non-Farm Jobs (82.2% correlation)
- MSA Population (44.2% correlation)
- MSA Consumer Price Index (72.3% correlation)
- U.S. Personal Spending (75.0% correlation)

Based on these variables, along with several others, we have created a regression forecast model that has a 99.6% R-Squared, indicating an extremely high prediction confidence level, within a standard error of 4.9%.

**RevPAR, Seasonally Adjusted**

Source: Lodging Analytics Research & Consulting, Visit Anaheim

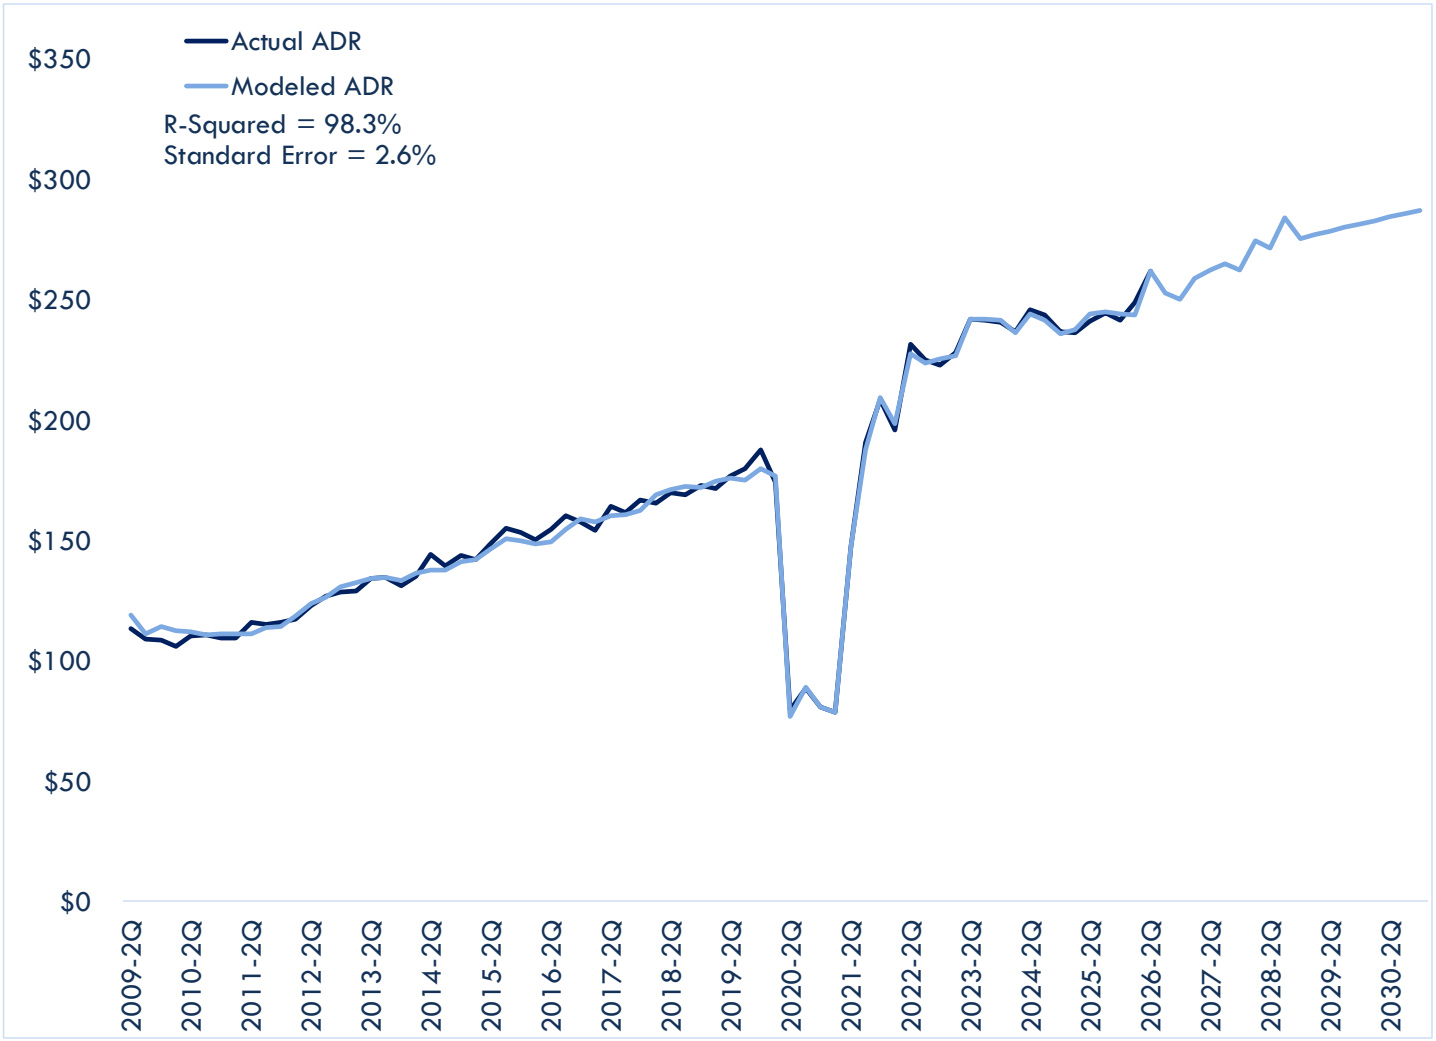

**ADR Growth Outlook**

In addition to supply and convention pacing data, our seasonally adjusted ADR model is primarily driven by the following key variables:

- MSA Non-Farm Jobs (86.4% correlation)
- MSA Population (46.6% correlation)
- MSA Consumer Price Index (87.0% correlation)
- U.S. Personal Spending (88.2% correlation)

Based on these variables and a few others, we have created a regression forecast model that has a 98.3% R-Squared, indicating an extremely high prediction confidence level, within a standard error of 2.6%.

**ADR, Seasonally Adjusted**

Source: Lodging Analytics Research & Consulting, Visit Anaheim

**Occupancy Growth Outlook**

Using our RevPAR and ADR growth outlooks we derive our occupancy outlook. Using our Supply growth forecast as well, we back into our demand growth outlook. Detailed Supply, demand, occupancy, RevPAR, and ADR forecasts by quarter and by year through 2030 are available on page 6 and by month on page 9.

**Outlook for Primary Macro-Economic Drivers of our Visit Anaheim – Anaheim Models**

Aside from Visit Anaheim convention pace data, the primary drivers of our Visit Anaheim – Anaheim forecast models include MSA Non-Farm Jobs, MSA Population, and MSA Consumer Price Index, as well as national factors that impact leisure demand, such as the U.S. Personal Spending. There are other factors that we incorporate into our models, such as MSA Office Employment, but their impact is less meaningful than these drivers.

Local MSA factors will be mixed relative to national averages over the next five years. Anaheim non-farm jobs are expected to grow at a slower pace than the national average over our entire forecast period, aside from during 2026. Anaheim population is expected to modestly decline through most of the forecast, while the overall U.S. population grows. However, Anaheim CPI will grow faster than overall national figures. Elevated inflation should support ADR growth across the market. U.S. Personal Spending growth won't exceed 2% until 2028. The confluence of these factors should support growth for the Visit Anaheim – Anaheim hotel fundamentals moving forward.

**Outlook for Primary Macro-Economic Drivers in Anaheim MSA**

| | Non-Farm Jobs | Population | CPI | U.S. Personal Spending |
|---|---|---|---|---|
| RevPAR Correlation | 82.2% | 44.2% | 72.3% | 75.0% |

# Lodging Supply

Supply growth across the Visit Anaheim – Garden Grove set has been muted over the last few years. There has been only one hotel in the Visit Anaheim – Garden Grove set to open since 2022, for a total of 124 rooms. The hotel was a Home2 Suites by Hilton Garden Grove Anaheim that opened in August 2023. This hotel represents a supply increase of just 2.9% in the Visit Anaheim – Garden Grove set room since then.

**Visit Anaheim – Garden Grove Recent Openings**

| Hotel | Zip Code | Submarket | Rooms | Opening Date |
|---|---|---|---|---|
| Home2 Suites by Hilton Garden Grove Anaheim | 92843 | Anaheim | 124 | August-23 |

Source: BuildCentral, Lodging Analytics Research & Consulting, Costar

Moving forward, we expect openings in the Visit Anaheim – Garden Grove set to remain muted. Currently, there are no hotels under construction that fall in the Visit Anaheim – Garden Grove boundaries. However, there are several in the planning phase of development– but it is uncertain when or if they will develop. With this in mind, we assume fewer than 20% of the rooms currently in planning will open within the next five years.

**Visit Anaheim – Garden Grove Hotel Developments (All Projects Under Construction, Select Projects in Planning)**

| Hotels | Zip Code | Rooms | Development Phase | Opening Date | Scales |
|---|---|---|---|---|---|
| Nickelodeon Hotel & Resort Garden Grove | 92840 | 500 | Planning | | Independent |
| Le Méridien Anaheim Garden Grove | 92840 | 402 | Planning | | Upper Upscale |
| Kimpton Garden Grove Anaheim | 92840 | 371 | Planning | | Upper Upscale |
| Grove District Resort Hotel Three | 92840 | 250 | Planning | | Not Yet Determined |

Source: BuildCentral, Lodging Analytics Research & Consulting, Costar

The broader Anaheim market has hotel rooms under construction equivalent to 0.3% of its existing inventory. Additionally, the market has a more elevated number of projects in the planning stage of development, but still only equates to 8.8% of the existing inventory. The Anaheim submarket, as defined by CoStar, has 0.0% of its existing inventory under construction currently. However, the submarket has more rooms in the planning stage of development which equates to 2.7% of the existing inventory. The Disneyland submarket, as defined by CoStar, has 0.6% of its existing inventory under construction currently. However, the submarket has many rooms in the planning stage of development which equates to 5.7% of the existing inventory.

The Visit Anaheim – Garden Grove set has 0.0% of its existing inventory under construction currently, but rooms in planning equate to 34.5% of existing inventories. However, the planning metric incorporates many projects which won't ever get developed, so that data point is unreliable. Nonetheless, there is a slight risk of elevated supply growth in the later years of our forecast.

# Revenue Forecast Models

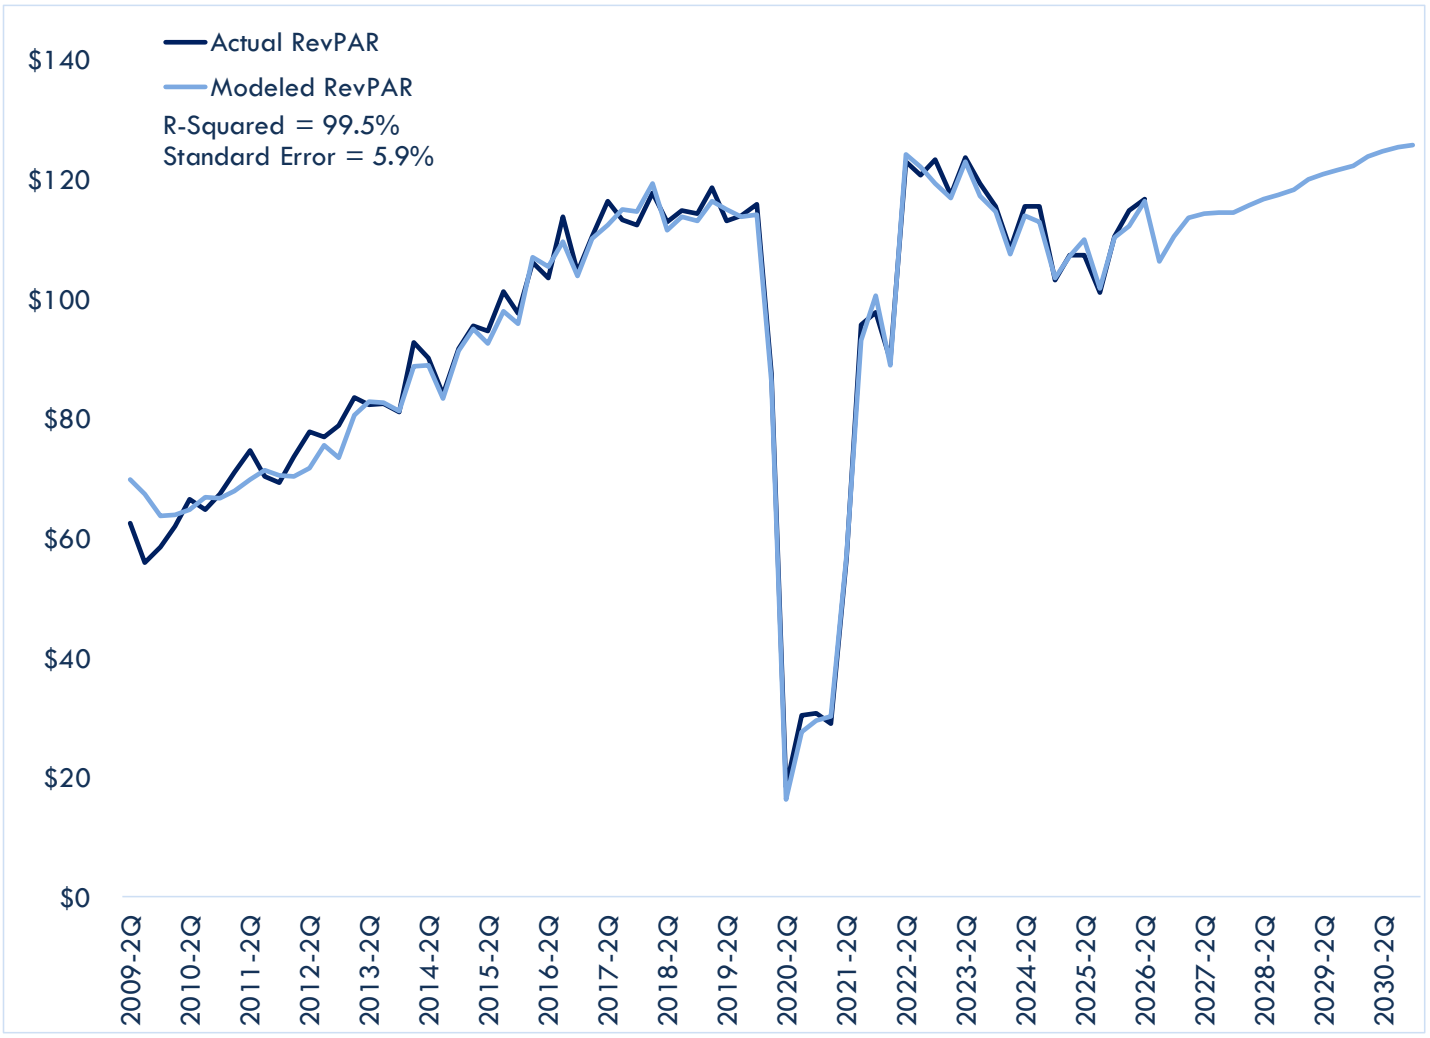

**RevPAR Growth Outlook**

In addition to supply and convention center pacing data, our seasonally adjusted RevPAR model is primarily driven by the following key variables:

- MSA Unemployment Rate (-89.7% correlation)
- U.S. Personal Savings Rate (-47.2% correlation)

Based on these variables, along with several others, we have created a regression forecast model that has a 99.5% R-Squared, indicating an extremely high prediction confidence level, within a standard error of 5.9%.

**RevPAR, Seasonally Adjusted**

Source: Lodging Analytics Research & Consulting, Visit Anaheim

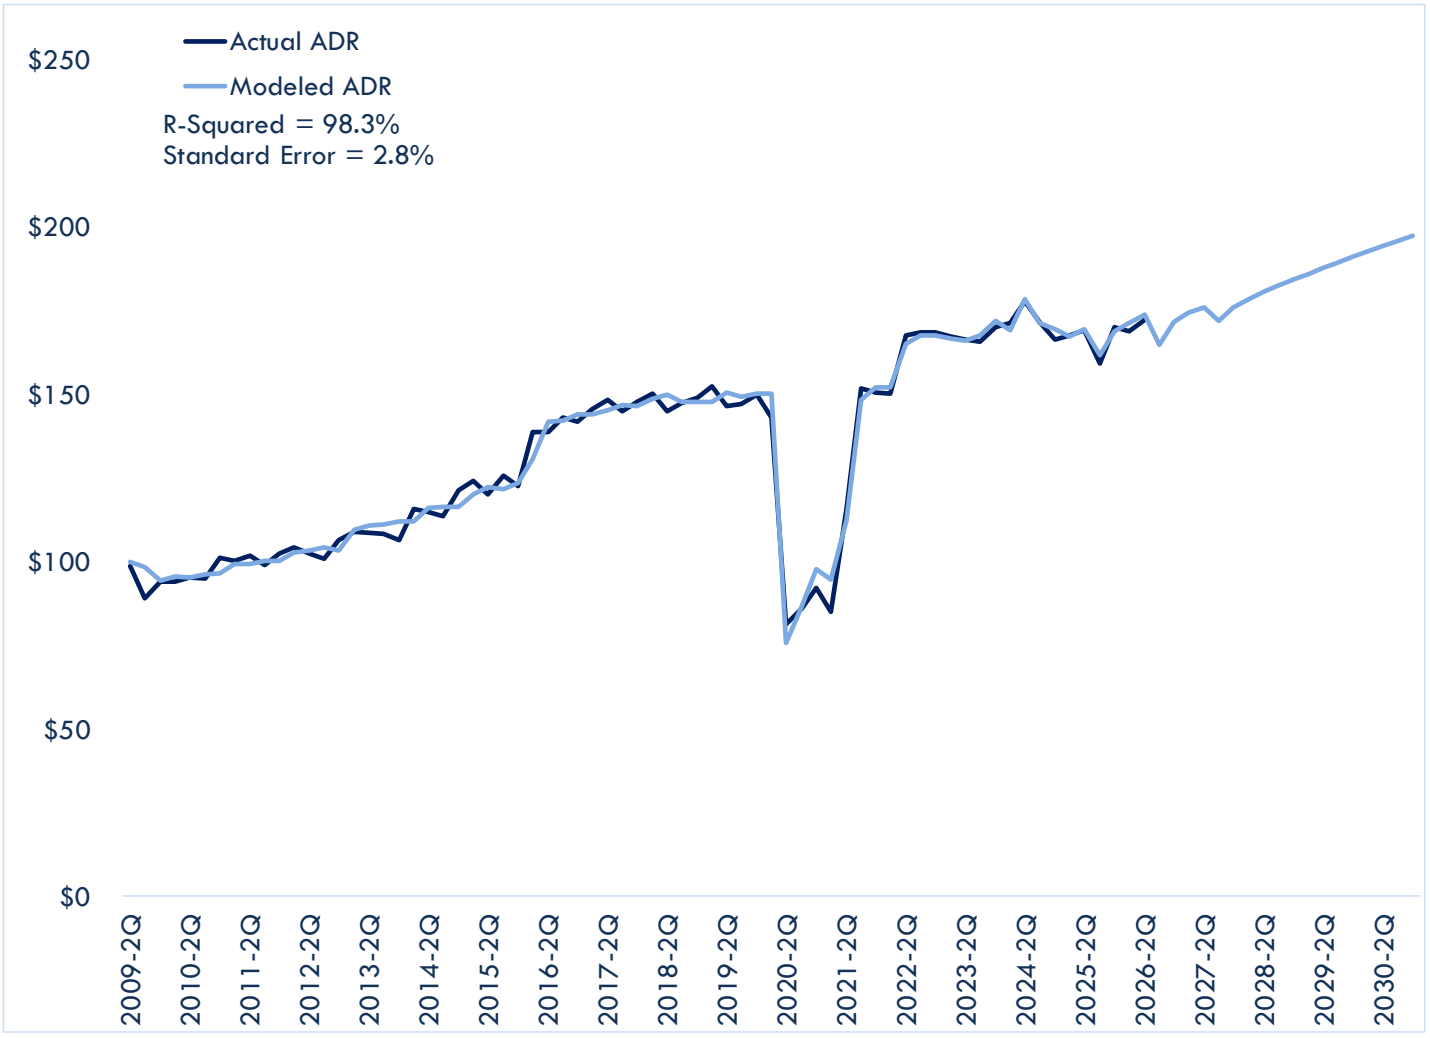

**ADR Growth Outlook**

In addition to supply and convention center pacing data, our seasonally adjusted ADR model is primarily driven by the following key variables:

- MSA Unemployment Rate (-86.3% correlation)
- MSA Consumer Price Index (78.2% correlation)
- MSA Population (60.1% correlation)
- U.S. Personal Savings Rate (-17.9% correlation)

Based on these variables and a few others, we have created a regression forecast model that has a 98.3% R-Squared, indicating an extremely high prediction confidence level, within a standard error of 2.8%.

**ADR, Seasonally Adjusted**

Source: Lodging Analytics Research & Consulting, Visit Anaheim

**Occupancy Growth Outlook**

Using our RevPAR and ADR growth outlooks we derive our occupancy outlook. Using our Supply growth forecast as well, we back into our demand growth outlook. Detailed Supply, demand, occupancy, RevPAR, and ADR forecasts by quarter and by year through 2030 are available on page 17 and by month on page 20.

**Outlook for Primary Macro-Economic Drivers of our Visit Anaheim – Garden Grove Models**

Aside from Visit Anaheim convention pace data, the primary drivers of our Visit Anaheim – Garden Grove forecast models include MSA Unemployment Rate, MSA Population, and MSA Consumer Price Index, as well as national factors that impact leisure demand, such as the U.S. Personal Savings Rate. There are other factors, including Visit Anaheim – Garden Grove Supply, that we incorporate into our models, but their impact is less meaningful than these drivers.

Most local MSA factors will generally outperform national averages over the next five years. The Anaheim unemployment rate is expected to fall faster than the national average annually and will outperform throughout the entire forecast. Anaheim population is expected to modestly decline through most of the forecast, while the overall U.S. population grows. Anaheim CPI will grow faster than overall national figures. Elevated inflation should support ADR growth across the market. Meanwhile, U.S. Personal Savings will decline substantially in 2026 before peaking in 2027 while remaining elevated through 2030. This factor indicates added pressure on the U.S. consumer, which could limit leisure travel to the market. The confluence of these factors should support growth for the Visit Anaheim – Garden Grove hotel fundamentals moving forward.

**Outlook for Primary Macro-Economic Drivers in Anaheim**

| | Unemployment Rate | Population | CPI | U.S. Personal Savings |
|---|---|---|---|---|
| RevPAR Correlation | -89.7% | 51.0% | 46.3% | -47.2% |
| ADR Correlation | -86.3% | 60.1% | 78.2% | -17.9% |
