Introduction

Visitors are integral to the Anaheim economy, generating significant financial benefits for residents and local businesses. Visitor activity also produces substantial tax revenue which supports government services.

Credible measurements of the visitor economy are designed to inform policy decisions that foster the sector's development.

To quantify the significance of the Anaheim visitor economy, Tourism Economics developed a comprehensive analysis of visitor spending and its total economic impact on businesses, employment, personal income, and taxes. At a high level, our approach includes the following stages:

- Compilation of visitor statistics
- Compilation of industry data
- Compilation of government data
- Analysis of visitor spending by category
- Economic impact modeling

TOURISM ECONOMICS

KEY FINDINGS

Key Findings

Visitors Generate Significant Economic Impact

In 2025, **26.5 million visitors spent $6.8 billion** in the Anaheim economy, generating a total economic impact of $10.4 billion.

26.5M VISITORS TO ANAHEIM

$6.8B VISITOR SPENDING

$10.4B TOTAL ECONOMIC IMPACT

$3.0B TOTAL PERSONAL INCOME

67,817 TOTAL JOBS SUPPORTED

$1.0B STATE AND LOCAL TAXES

Results in Context

The visitor economy is an economic pillar in Anaheim. In 2025, visitor spending supported one-in-three jobs in the city. In addition:

$6.8B VISITOR SPENDING

Visitors spent $18.7 million per day in Anaheim, on average.

$3.0B PERSONAL INCOME

This is equivalent to $28,118 per resident household, across all households in the city.

67,817 JOBS

The visitor economy sustained 32.8% of all jobs in Anaheim in 2025.

$1.0B STATE & LOCAL TAXES

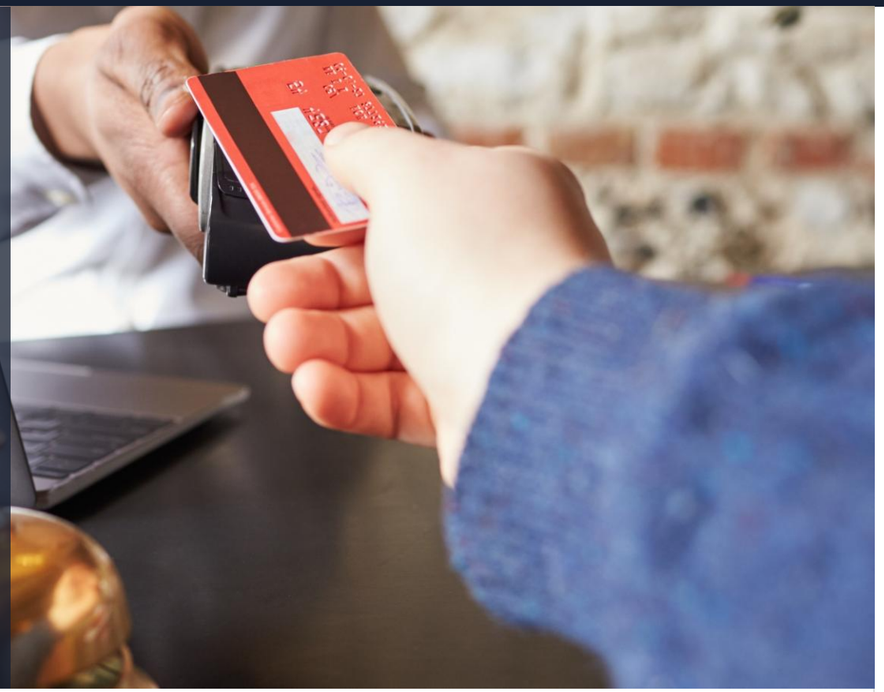

State and local taxes generated by the visitor economy offset resident taxes by $8,940 per household.

TOURISM ECONOMICS

VISITOR VOLUME & SPENDING

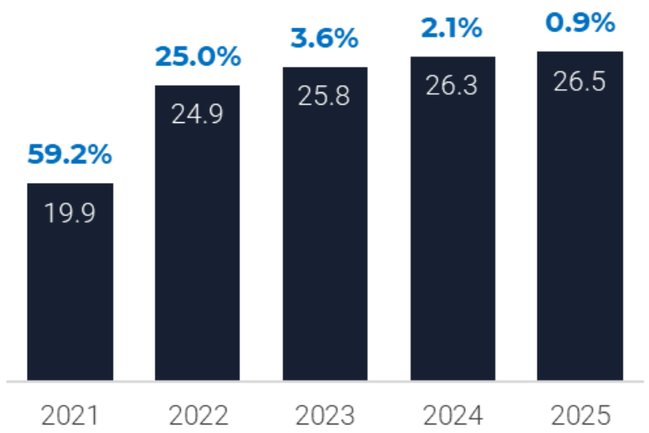

Anaheim welcomed **26.5 million** visitors who spent **$6.8 billion** in 2025.

Visitor Volume

Visitor volume to Anaheim posted steady growth in 2025 (+0.9%), reaching 26.5 million visitors. Day trips were the primary driver, increasing 1.1% year-over-year.

Anaheim Visitor Volume
millions

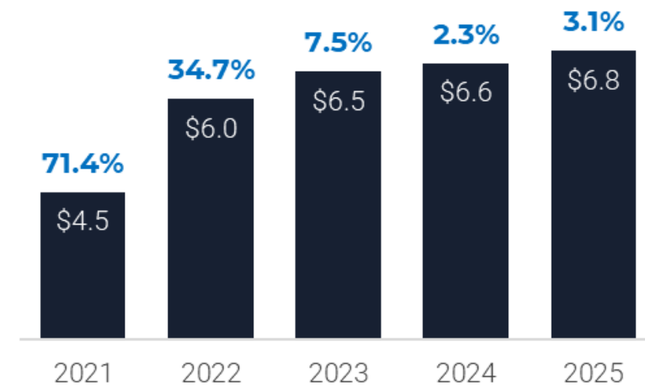

Source: Tourism Economics

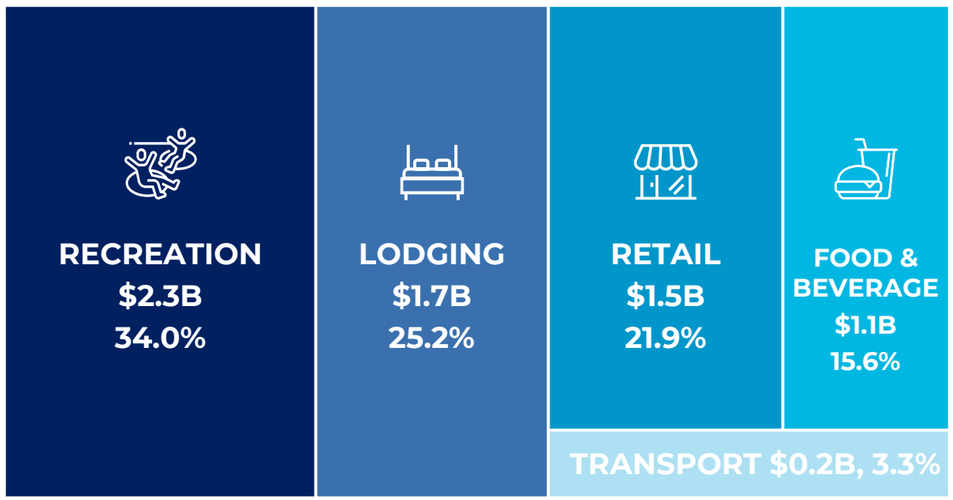

Visitor Spending

Visitor spending reached $6.8 billion in 2025, a 3.1% increase over the prior year.

Recreation represented the largest component of spending at $2.3 billion, 34.0% of the total. Lodging followed as the second-largest category at 25.2%.

Anaheim Visitor Spending
$ billions

Note: Lodging includes all accommodation types.

Visitor Volume and Spending Trends

Spending growth of 3.1% in 2025 was supported by moderate increases in both visitation and prices.

Food and beverage spending recorded the fastest growth, up 5.5% year-over-year due in part to elevated prices, followed by recreation at 4.3%. Transportation spending saw limited growth, rising just 0.3% as lower gas prices tempered gains.

STR data indicates room demand rose 0.4%, occupancy improved from 74.9% to 75.2%, and average daily rate increased 0.9%.

Day visitors comprised the majority of trips (67.5%), while just under one-third of visitors stayed overnight. Most visitation is domestic, accounting for approximately 93% of the total.

ECONOMIC IMPACT METHODOLOGY

Economic Impact Methodology

The development of visitor economy impact modeling begins with a comprehensive demand side analysis. Visitor survey data provides estimates on the volume of visitors by type and their spending in specific industries (e.g. lodging, restaurants, retail, recreation and entertainment, transportation). These estimates are strengthened through an analysis of industry-specific data sets on the lodging industry, aviation, and sectoral-level business sales. Government data, including taxes by type, as well as employment and personal income by industry, are used to supplement and confirm demand-side visitor spending calculations.

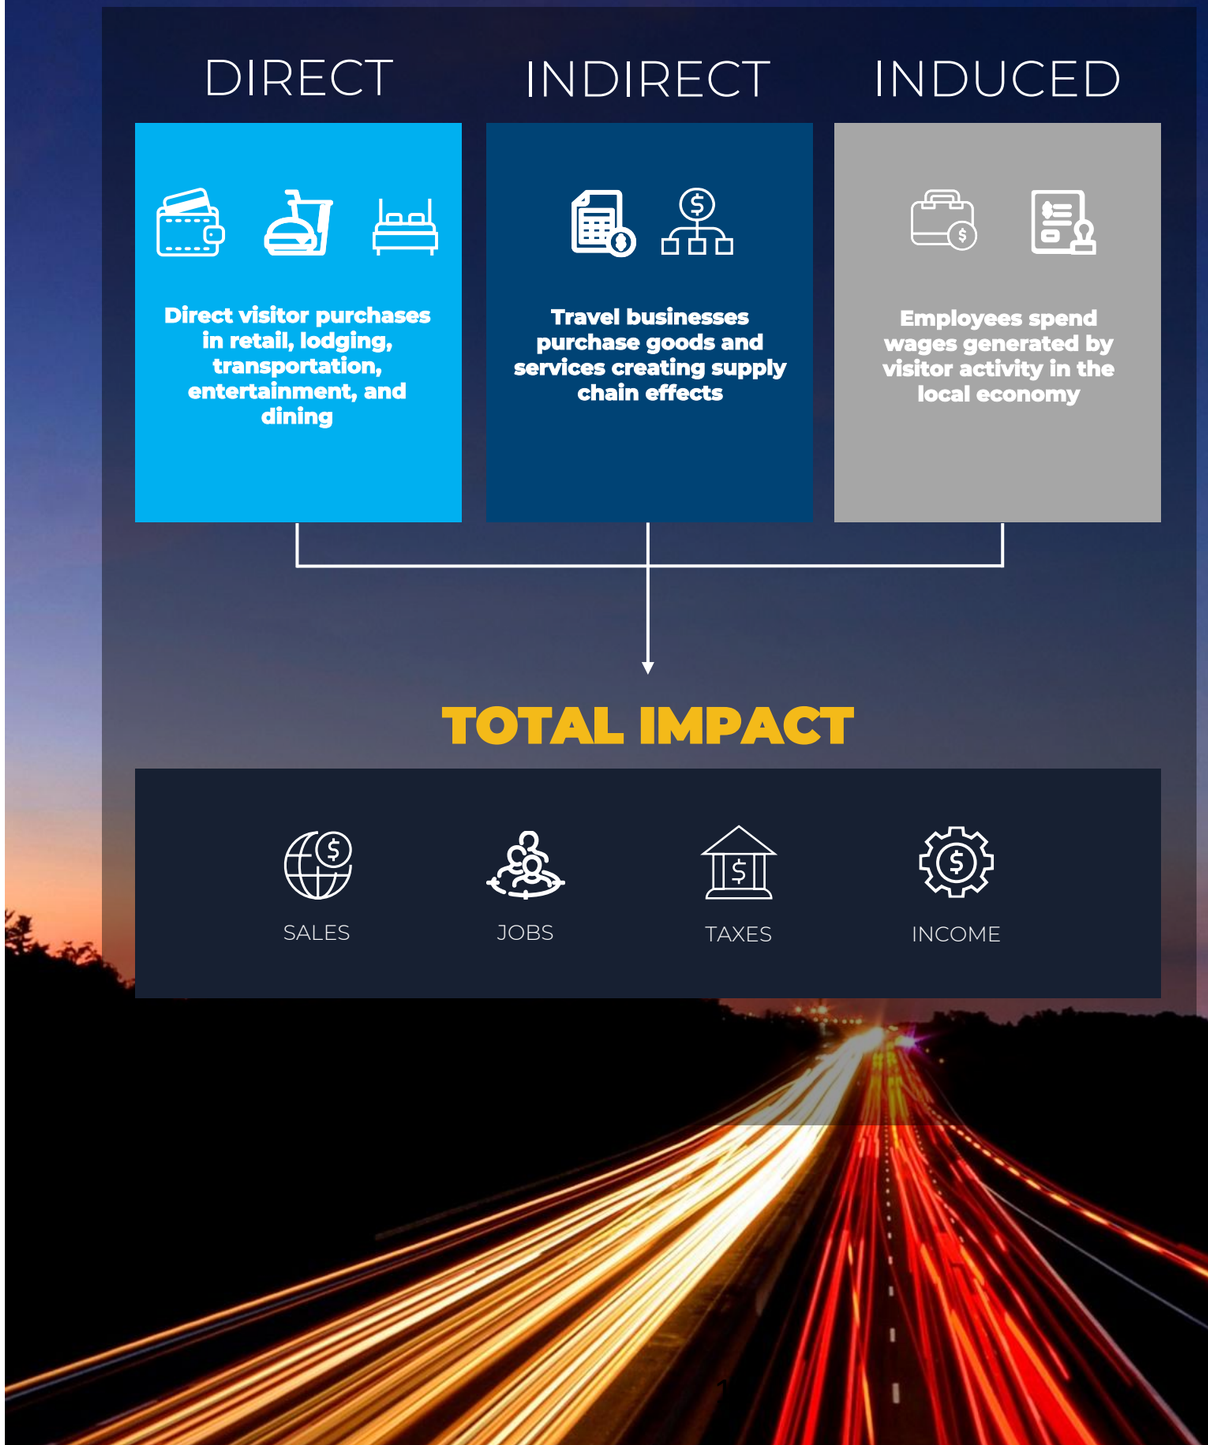

This provides a detailed profile of visitor spending by industry, which is then connected to a local input-output (I-O) economic impact model constructed within the IMPLAN platform. This uses government (Bureau of Economic Analysis and Census) data to trace the flow of visitors through the local economy and its effects on businesses, households, and government. The model quantifies three levels of impact:

1. **Direct impacts:** Visitor spending creates direct economic value within a defined set of sectors. This supports a proportion of spending, jobs, wages, and taxes within each sector.
2. **Indirect impacts:** Businesses providing direct services to visitors purchase goods and services, generating additional impacts called indirect impacts or supply-chain effects.
3. **Induced impacts:** Additional business activity is generated as employees spend incomes locally that are earned due to visitor activity. This is called the induced impact or income effect.

The model calculates these three levels of impact—direct, indirect, and induced—for the following metrics:

- Spending
- Wages
- Employment
- Federal Taxes
- State Taxes
- Local Taxes

Economic Impact Model

TOURISM ECONOMICS

ECONOMIC IMPACT

Business Sales Impacts

Visitors spent $6.8 billion in Anaheim in 2025. These direct impacts generated an additional $3.6 billion through supply chain (indirect) and income (induced) effects.

As a result, the total economic impact of visitors reached $10.4 billion in 2025.

$6.8B Visitor Spending *(Direct Sales)* + **$1.5B** Indirect Sales + **$2.1B** Induced Sales = **$10.4B** Total Economic Impact

Employment Impacts

Visitor activity sustained 47,925 direct jobs in 2025, with an additional 19,892 jobs supported from the indirect and induced impacts of visitor activity. Total employment impacts tallied 67,817 in 2025, translating to one-in-three jobs in the city.

47.9K Direct Jobs + **9.3K** Indirect Jobs + **10.6K** Induced Jobs = **67.8K** Total Jobs

Tax Impacts

Visitor activity generated $1.6 billion in government revenues in 2025.

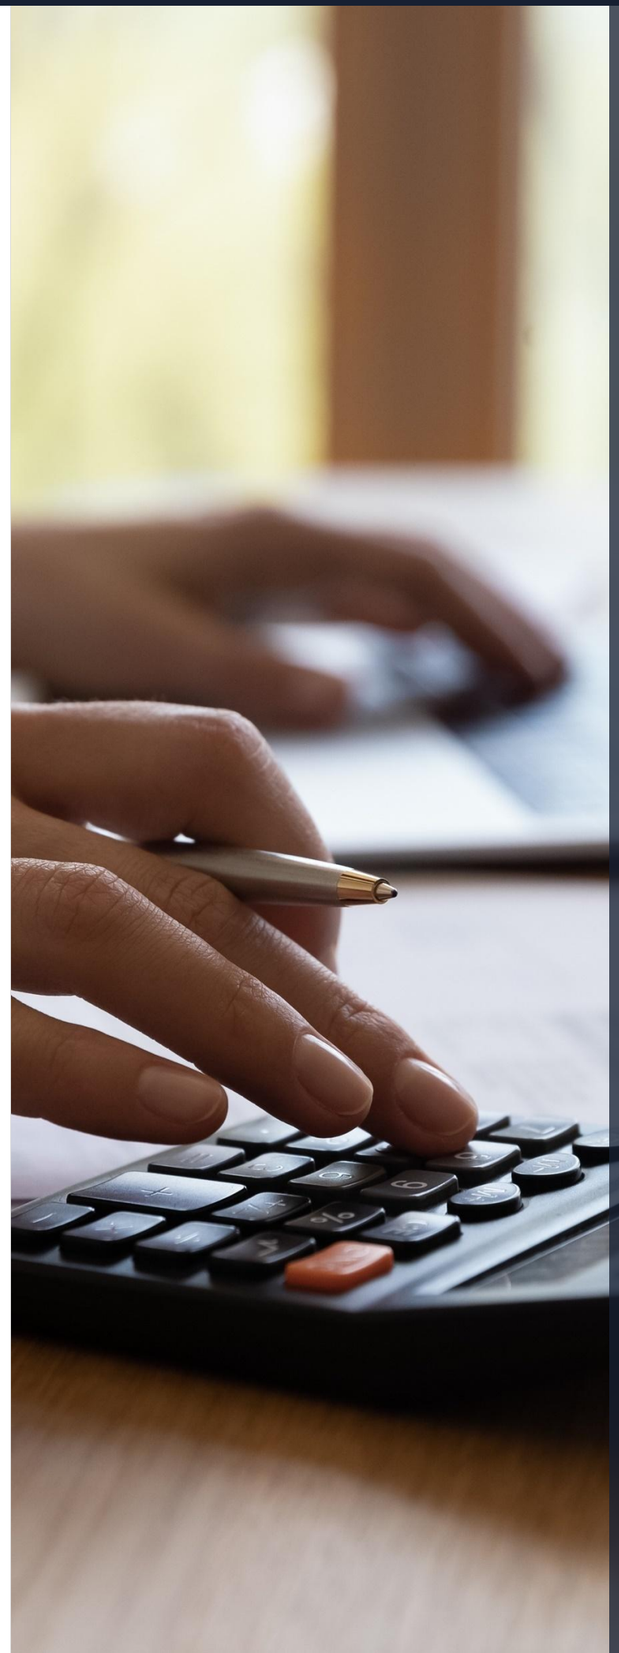

State and local taxes alone tallied $970 million in 2025.

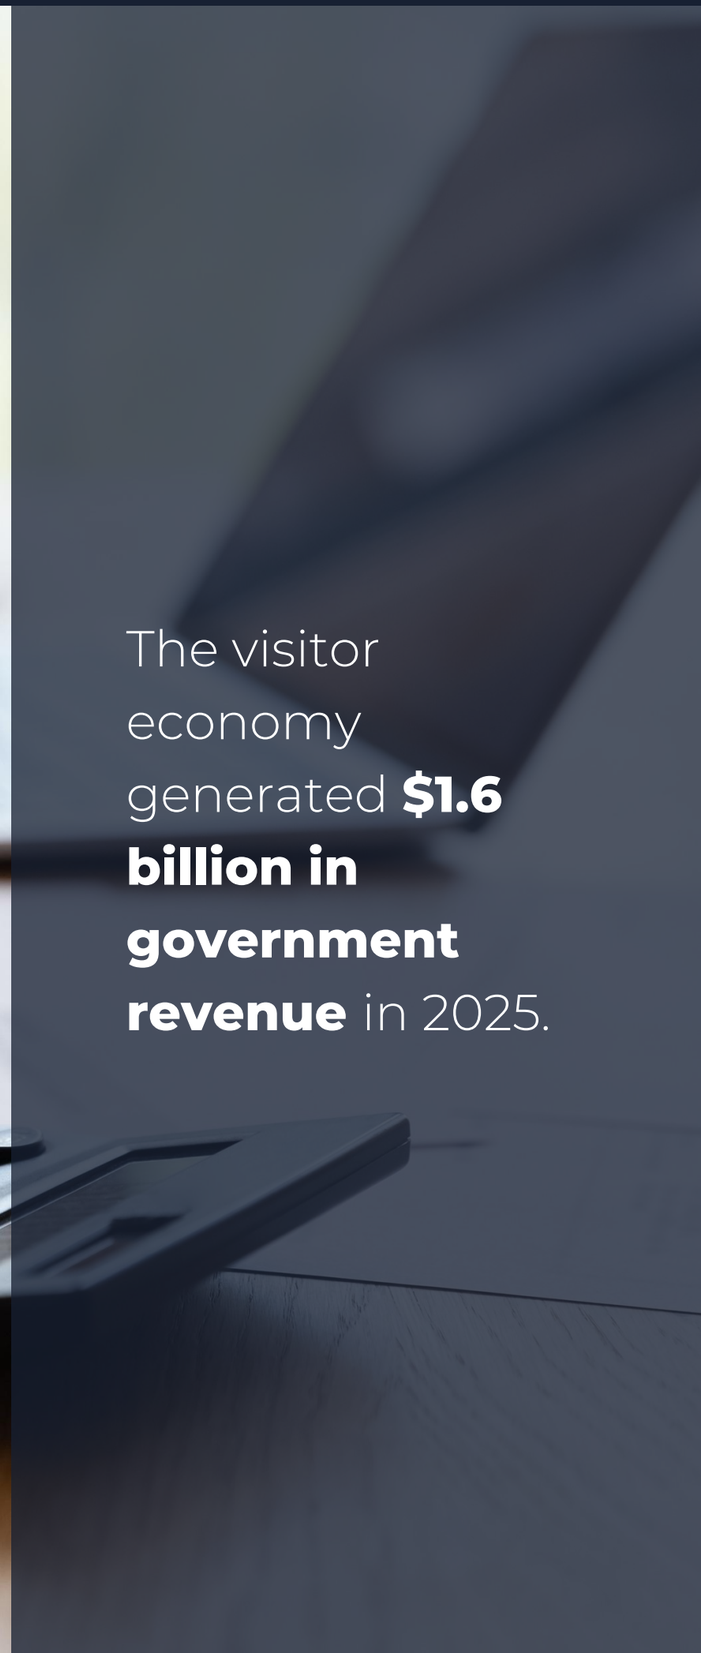

Each household in Anaheim would need to be taxed an additional $8,940 to replace the visitor-generated taxes received by state and local government in 2025.

APPENDIX

Appendix

Methodology Overview

Measuring the visitor economy begins with a comprehensive demand side analysis. A visitor is defined as someone who stayed overnight or traveled more than 50 miles to the destination.

The study area is defined as Anaheim, California.

Visitor survey data provide estimates on the volume of visitors by type and their spending in specific categories (e.g. lodging, restaurants, retail, recreation and entertainment, transportation). These estimates are strengthened through an analysis of industry-specific data sets on the lodging industry, aviation, and sectoral-level business sales. Government data, including taxes by type as well as employment and personal income by industry are used to supplement and confirm demand-side visitor spending calculations.

The primary source of the employment and wage data is the Regional Economic Information System (REIS), maintained by the Bureau of Economic Analysis (BEA). This is more comprehensive than Bureau of Labor Statistics (BLS QCEW) data because sole-proprietors do not require unemployment insurance and are not counted in the QCEW data.

The complete set of data inputs is provided below.

Data Sources

- **Bureau of Economic Analysis and Bureau of Labor Statistics:** Employment and wage data, by industry
- **STR:** Lodging metrics, including room demand and supply, room rates, occupancy, and room revenue
- **Visit Anaheim:** TID and TOT revenue data
- **California Department of Tax and Fee Administration (CADTFA):** County level sales tax data by industry category
- **U.S. Census Bureau:** Economic Census data, as well as data on population, households, and second homes
- **U.S. Energy Information Administration:** Regional gasoline prices
- **Tourism Economics:** International arrivals and spending data for the Los Angeles, Riverside, and Orange County metro areas
- **Visitor surveys:** Historical visitor profile research on volume, spending, and visitor preferences and attributes

Glossary

SPENDING DEFINITIONS

LODGING	*All accommodation businesses, including hotels, B&Bs, campgrounds, and short-term rentals. This includes food, entertainment, and other services provided by these establishments.*
FOOD & BEVERAGE	*Includes all visitor spending on food & beverages, including at restaurants, bars, grocery stores and other food providers.*
RECREATION	*Includes visitors spending within the arts, entertainment and recreation sector.*
RETAIL	*Includes visitor spending in all retail sub-sectors within the local economy, excluding grocery stores.*
LOCAL TRANSPORT	*Ride share, taxis, limos, trains, rental cars, buses, and gasoline purchases.*
AIR TRANSPORT	*Where applicable, the local share of air transportation spending.*
SECOND HOMES	*Where applicable, spending associated with seasonal second homes for recreational use as defined by the Census Bureau.*

ECONOMIC IMPACT DEFINITIONS

DIRECT IMPACT	*Impacts (business sales, jobs, income, and taxes) related to businesses where visitors spend dollars (e.g. recreation, transportation, lodging).*
INDIRECT IMPACT	*Impacts created from the purchase of goods and services as inputs (e.g. food wholesalers, utilities, business services) into production by the directly affected sectors (i.e. business-to-business purchases).*
INDUCED IMPACT	*Impacts created from spending in the local economy by employees whose wages are generated either directly or indirectly by visitor activity.*
EMPLOYMENT	*Employment is measured by the Bureau of Economic Analysis (BEA) definition, and captures full-time and part-time jobs, which includes salary and wage employees and proprietors.*
PERSONAL INCOME	*Income (wages, salaries, proprietor income and benefits) supported by visitor spending.*
LOCAL TAXES	*City and County taxes generated by visitor spending. Includes any local sales, income, bed, usage fees, licenses and other revenue streams to local governmental authorities.*
STATE TAXES	*State tax revenues generated by visitor spending. Includes sales, income, corporate, usage fees and other assessments of state governments.*

About the Research Team

This study was conducted by the Tourism Economics group within Oxford Economics. Tourism Economics combines an understanding of traveler dynamics with rigorous economics to answer the most important questions facing destinations, investors, and strategic planners. By combining quantitative methods with industry knowledge, Tourism Economics designs custom market strategies, destination recovery plans, forecasting models, policy analysis, and economic impact studies.

Oxford Economics was founded in 1981 as a commercial venture with Oxford University's business college to provide economic forecasting and modeling to UK companies and financial institutions expanding abroad. Since then, we have become one of the world's foremost independent global advisory firms, providing reports, forecasts and analytical tools on 200 countries, 100 industrial sectors and over 3,000 cities. Our best-of-class global economic and industry models and analytical tools give us an unparalleled ability to forecast external market trends and assess their economic, social and business impact.

Oxford Economics is an adviser to corporate, financial and government decision-makers and thought leaders. Our worldwide client base comprises over 2,000 international organizations, including leading multinational companies and financial institutions; key government bodies and trade associations; and top universities, consultancies, and think tanks.

Oxford Economics employs more than 600 full-time staff, including 350+ professional economists and analysts. Headquartered in Oxford, England, with regional centers in London, New York, and Singapore, Oxford Economics has offices across the globe in Belfast, Chicago, Dubai, Miami, Milan, Paris, Philadelphia, San Francisco, and Washington DC.
