Introduction

Purpose of the Report

This report was commissioned by Visit California to assess the economic impact of travel to the state of California. The travel industry represents an important component of California's state economy. Spending associated with travel in California generates earnings, employment and taxes throughout the state. Many counties in California contain attractive travel destinations and consider the travel industry a primary economic industry in their area. This report describes economic activity associated with travel throughout the state, detailing important trends within the industry.

How to Use the Report

This report brings together data collected from many sources, both public and private, that are relevant to the measurement of travel throughout California. Our analysis synthesizes the data and generates estimates for the impact of travel to counties in the state. We encourage the reader of this report to use the table of contents to navigate to the section of the report that is relevant to their concerns and to reach out to Dean Runyan Associates with any questions on further detail or clarification.

Revisions

This report also presents revised travel impact figures for 2024 based on data available after the 2024 report was published. In addition, "Other Travel" spending has been revised for years 2022-2024. Please see methodology section for details.

Spending, Employment, Earnings, and Taxes are the key metrics to measure the economic impacts of travel.

What are travel impacts?

Travel impacts measure the economic impact of travel activity within a region. Because travel is a broad activity that encompasses many other activities (transportation, lodging, eating & drinking, recreational activities, etc.), it is necessary to make economic impact estimates for each travel related activity to determine the total travel impact. Travel impact reports are used by industry stakeholders to benchmark the travel industry against other local industries, understand the makeup of travel activity in their region, and communicate the economic relevance of the regional travel industry.

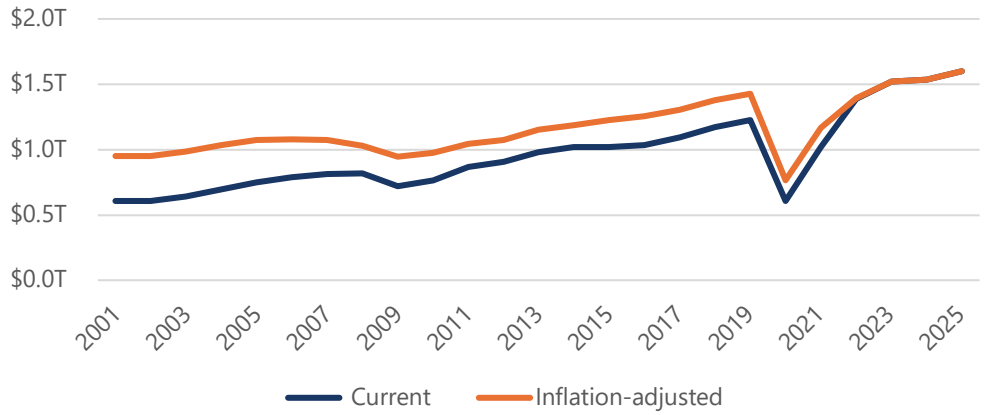

U.S. Travel Impacts

2025p

U.S. Travel Impacts

Direct Travel Spending

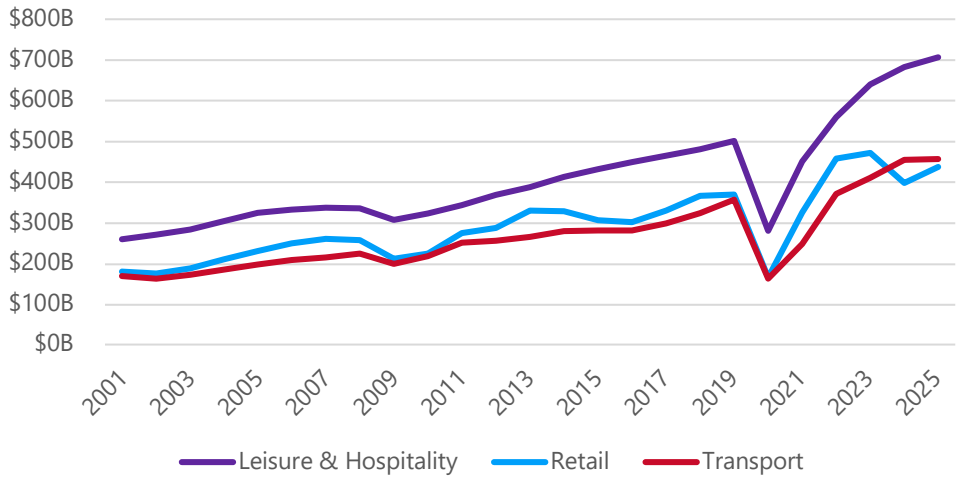

Direct Travel Spending 2001-2025

Source: Dean Runyan Associates
Note: Real spending is in chained 2025 dollars. Chained dollars are inflation-adjusted measures that account for changes in both prices and consumer spending patterns over time.

National travel-related spending was $1.6 trillion in 2025, a **4.27% (4.29% inflation-adjusted) increase** compared to the previous year.

Direct Travel Spending by Commodity 2001-2025

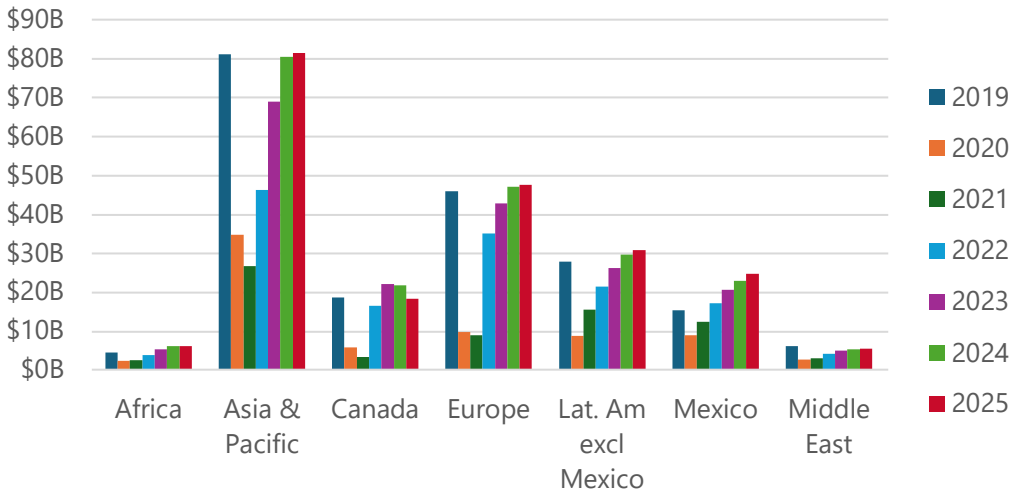

Source: Dean Runyan Associates
Note: DRA estimates 2025 national direct spending using Bureau of Economic Analysis (BEA) Travel and Tourism Satellite Account data from 2024 and available annual industry trends for 2025.

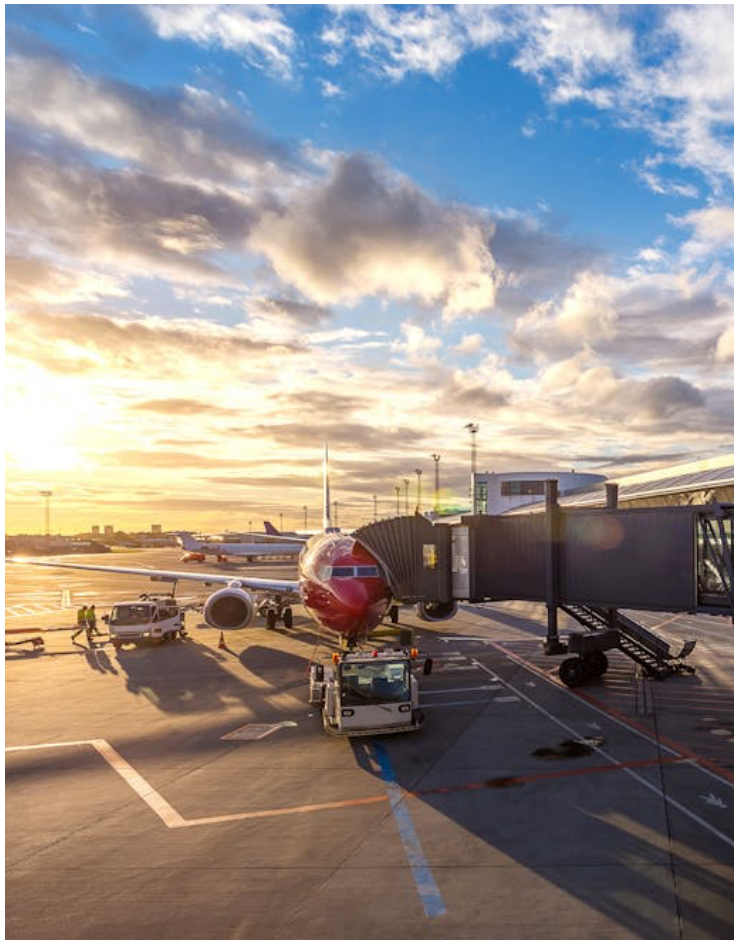

Travelers spent $706.4 billion on Leisure & Hospitality in 2025, accounting **for 44.2% of the total direct expenditures.**

U.S. Travel Impacts

Direct Spending

International Travel Spending 2019-2025

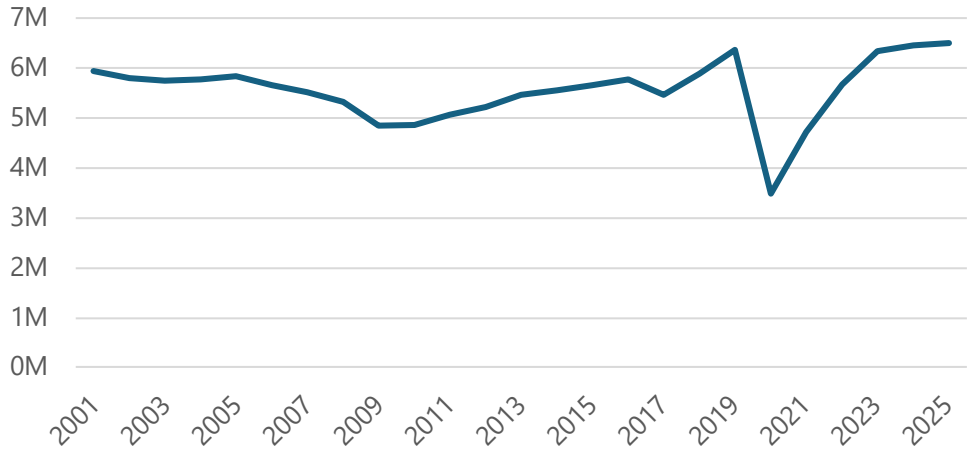

Overall, **international visitor spending increased 0.6% in 2025,** reaching $214.1 billion. Spending increased across most major international markets, led by Mexico and the Middle East, while spending from Canadian visitors declined 15.6%.

Sources: Dean Runyan Associates, U.S. Bureau of Economic Analysis
Note: International travel spending estimates do not include spending on health, education, or border-worker travel activity.

U.S. Travel Impacts

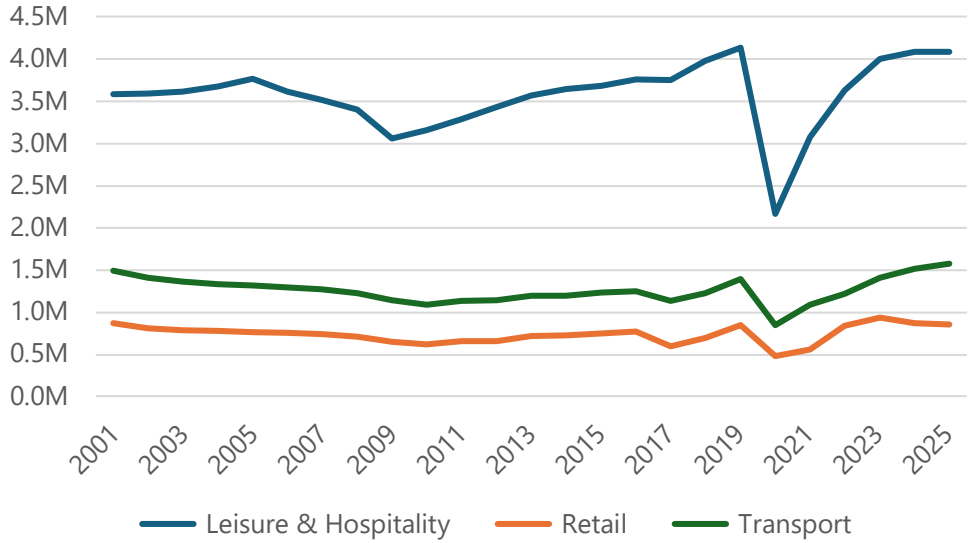

Direct Employment

Sources: Dean Runyan Associates, U.S. Bureau of Economic Analysis

Approximately **40.8 thousand jobs were gained in 2025, a 0.6% increase** compared to the previous year.

Direct Employment by Industry Sector

Sources: Dean Runyan Associates, U.S. Bureau of Economic Analysis

Travel supported approximately 4.1 million jobs in the Leisure and Hospitality industry in 2025, a **0.1% increase** compared to the previous year.

California Travel Impacts

2025p

California Travel Impacts

Direct Travel Impacts

2025 Summary

1.7% increase in Travel Spending

Direct travel spending in California increased 1.7% from $156.2 billion in 2024 to $158.9 billion in 2025.

4,350 Jobs gained

Direct travel-generated employment grew from 1,163,120 in 2024 to 1,167,470 in 2025. Approximately 4,350 jobs were generated, representing a 0.4% increase compared to the previous year.

3.3% Growth in Earnings

Direct travel-generated earnings grew from $64.6 billion in 2024 to $66.7 billion in 2025, an increase of approximately $2.1 billion or 3.3%.

3.6% Increase in Tax Revenue

Tax revenue (local and state) generated by travel spending grew from $13.2 billion in 2024 to $13.6 billion in 2025, a 3.6% increase.

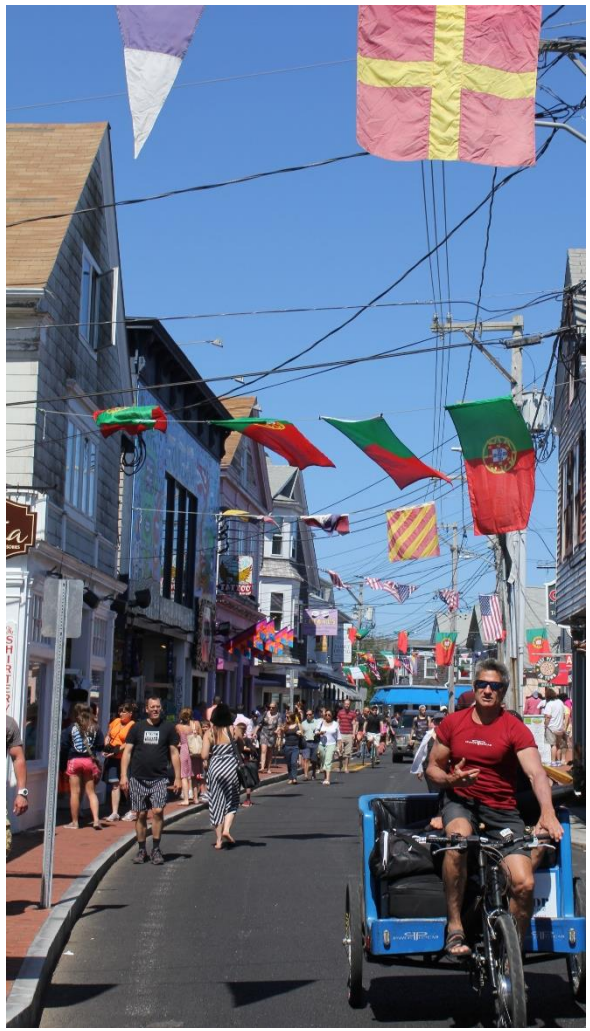

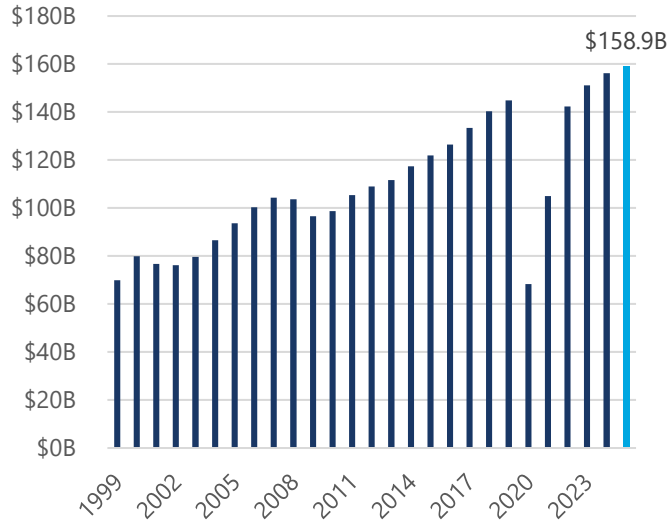

Photo by Visit California

Source: Dean Runyan Associates
Note: Estimates are subject to revision when more complete or additional data becomes available.

California Travel Impacts

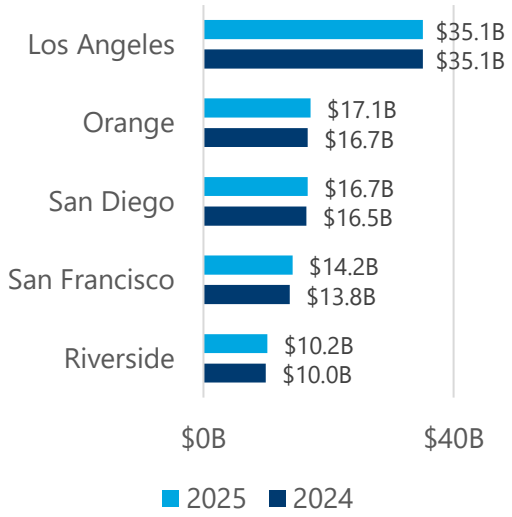

Direct Travel Spending

Direct travel spending increased by $2.7 billion in 2025.

Direct travel spending grew from $156.2 billion in 2024 to $158.9 billion in 2025, a 1.7% increase.

Direct travel spending increased in most California counties.

In 2025, direct travel spending increased in all California's top 5 counties except Los Angeles, which declined by 0.1%.

Visitor + Other Travel
=
Direct Travel Spending

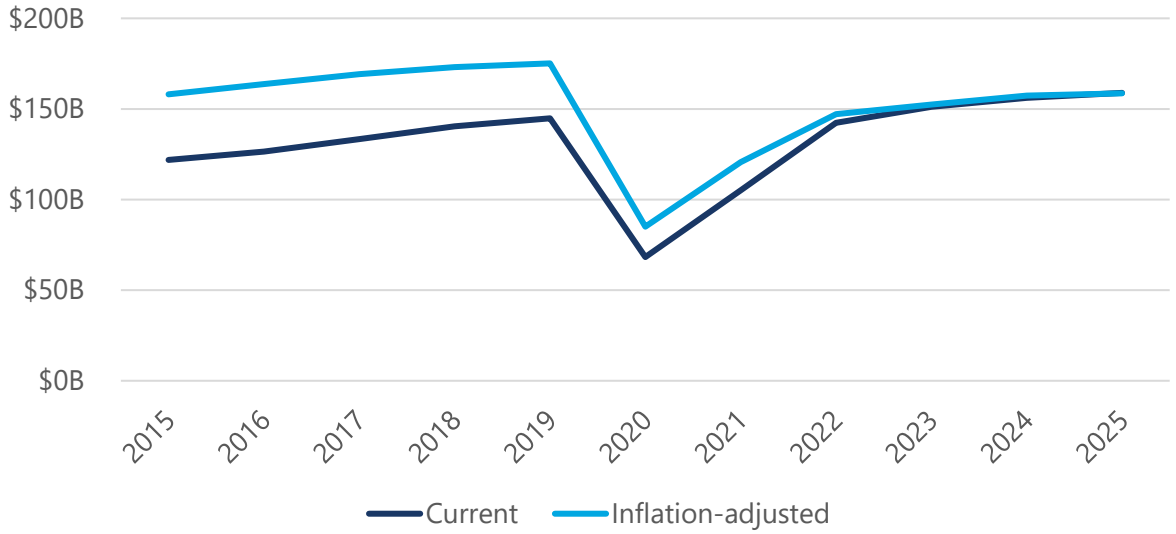

Direct travel spending includes both destination spending and other spending. **Visitor spending** refers to all spending on goods and services by visitors at the destination. **Other travel spending** refers to expenditures at travel arrangement companies located in California, convention and trade show operations, spending on air by residents to leave the state for travel elsewhere, and ground transportation to other California destinations. These expenditures directly support the travel industry in California but are not considered visitor spending in our methodology.

California Travel Impacts

Inflation-Adjusted Spending

Direct travel spending grew from $156.2 billion in 2024 to $158.9 billion in 2025, an increase of $2.7 billion in current dollars. However, considering inflation, the true quantity of goods and services purchased by travelers increased 0.8% or $1.2 billion.

Current and Inflation-Adjusted Direct Travel Spending

In 2025, travel spending increased $2.7 billion or 1.7% in current dollars, or $1.2 billion or 0.8% in inflation-adjusted dollars.

Sources: Dean Runyan Associates, U.S. Bureau of Labor Statistics CPI
Note: Inflation-Adjusted values are in 2025 dollars as of February 2026

Inflation is the **rate of increase** in prices of goods and services.

How does inflation affect the travel industry?

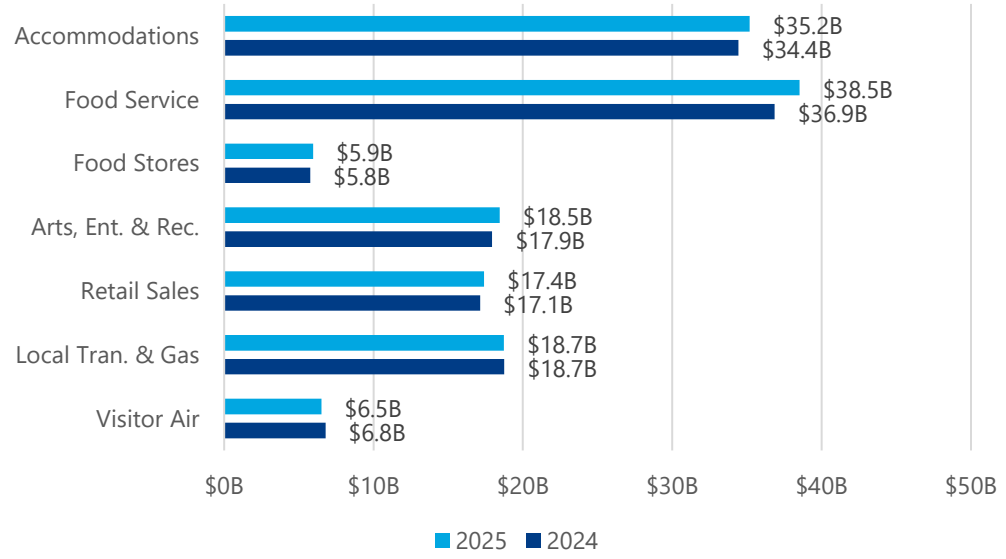

Inflation is the rate of increase in prices of goods and services. An increase in the rate of inflation translates into reduced purchasing power for consumers. To track the quantity of goods and services that consumers purchase when they travel, we report the "Inflation Adjusted" travel spending in the chart to the left. This is also known as "real" spending, as it shows the quantity of goods and services that were purchased while keeping the purchasing power constant across time.

U.S. CPI (annual % chg.)
2024: 2.62%
2025: 2.63%
Target: 2% Annually

California Travel Impacts

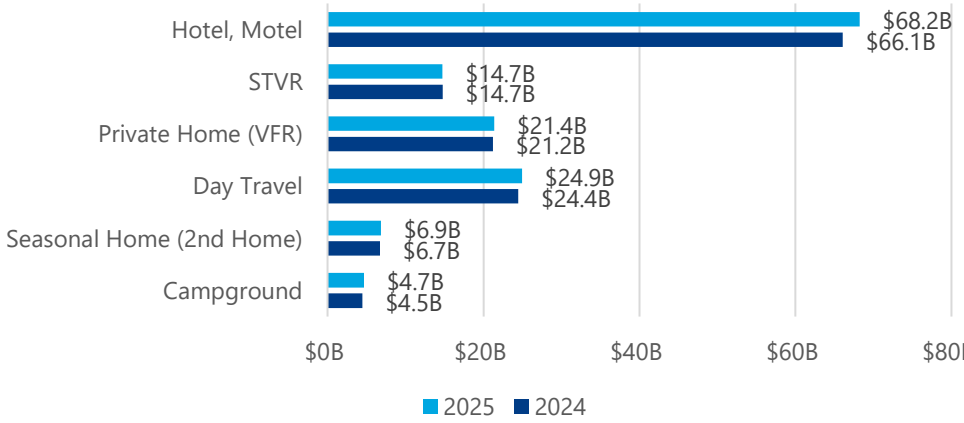

Direct Visitor Spending

Direct Visitor Spending by Commodity Purchased

Spending on accommodations grew to $35.2 billion in 2025, **an increase of 2.2%.** Spending on food service generated $38.5 billion, **an increase of 4.6%.**

Direct Visitor Spending by Accommodation Type

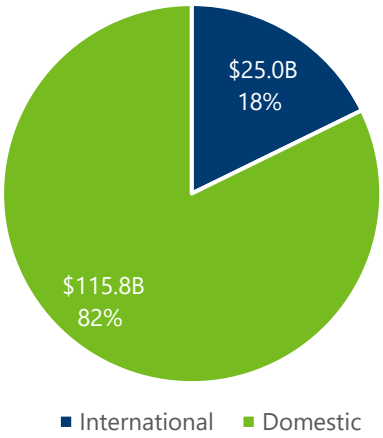

Visitors who stayed in a hotel, motel, or short-term vacation rental (STVR) spent a combined $83.0 billion in 2025, an **increase of 2.7%** compared to 2024.

Sources: Dean Runyan Associates, Omnitrak Group, Energy Information Administration, Bureau of Labor Statistics CPI, STR

California Travel Impacts

Direct Visitor Spending

Direct Visitor Spending by Origin, 2025p

In 2025, spending by domestic visitors (residents of the U.S.) accounted for 82% of all visitor spending in California.

Direct Visitor Spending by International Visitors

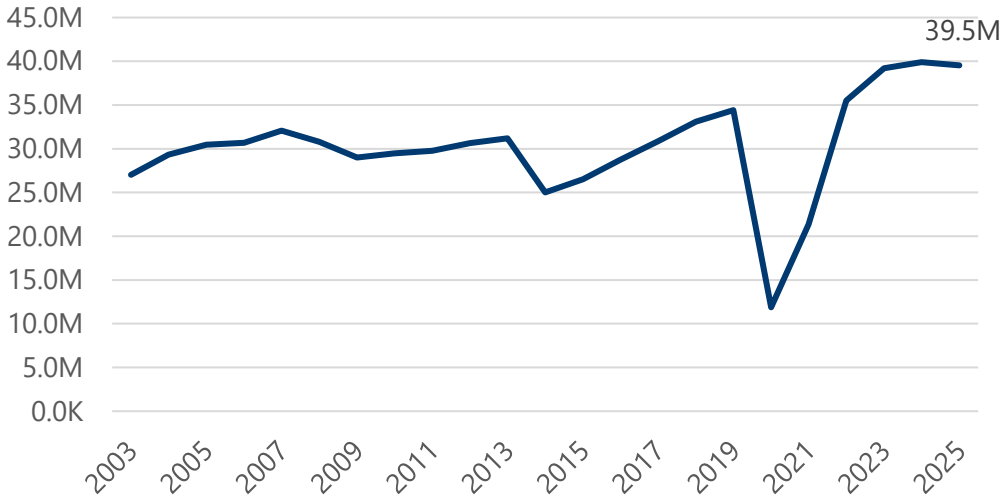

International visitors spent $25.0 billion in California in 2025, down $1.0 billion from 2024.

Sources: Dean Runyan Associates, U.S. Bureau of Economic Analysis, National Travel and Tourism Office, Tourism Economics
Note: Percent change calculated on unrounded figures.

California Travel Impacts

Air Travel and Lodging Sales Trend

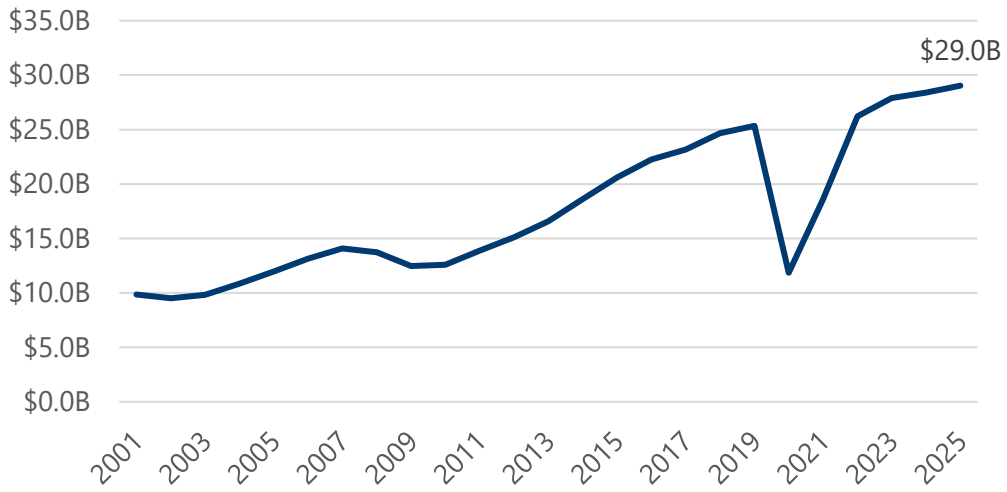

Domestic Air Visitor Arrivals via U.S. Air Carriers

Visitor air travel on domestic flights to California destinations **decreased by 0.9%** in 2025, from 39.9 million to 39.5 million.

Sources: Dean Runyan Associates, U.S. Bureau of Transportation Statistics

Taxable Lodging Sales

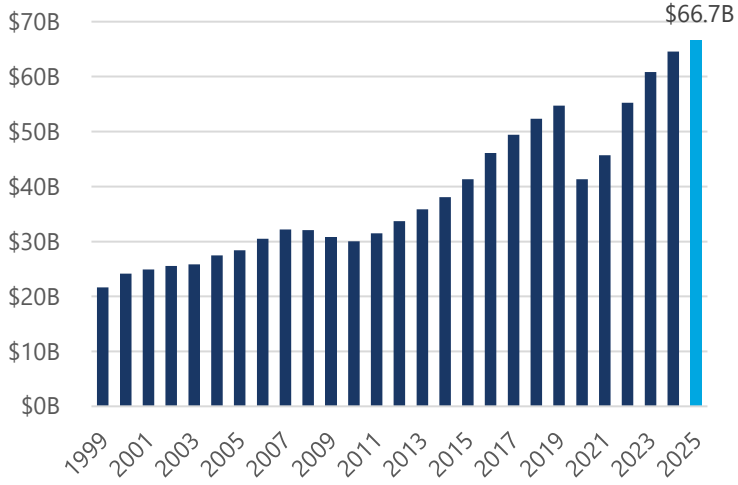

Taxable lodging sales grew to $29.0 billion in 2025, a **2.2% increase** compared to 2024.

Sources: Dean Runyan Associates, Local governments in California.

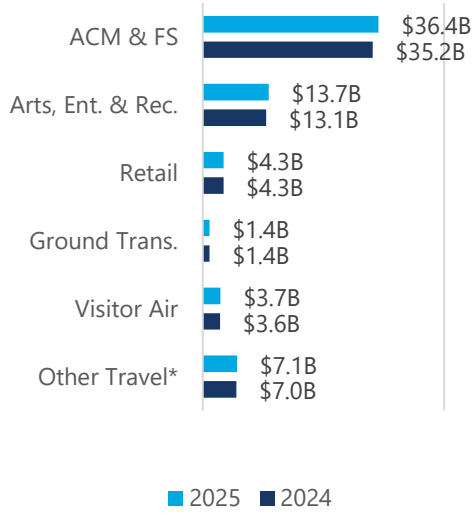

California Travel Impacts

Direct Travel-Generated Earnings

Direct travel-generated earnings increased by $2.1 billion in 2025.

All component sectors of the travel industry grew in 2025.

*Other travel includes ground transportation to other California destinations, resident air travel, travel arrangement services, and convention/trade show services.

Direct travel-generated earnings grew from $64.6 billion in 2024 to $66.7 billion in 2025, an increase of 3.3%. Between 2015 and 2025, travel-generated earnings in California grew at an average annual rate of 4.9%.

Accommodation & Food Services (ACM & FS) earnings reached $36.4 billion contributing 54.7% of state-wide earnings.

(Revenue - Cost of Goods Sold - Expenses - Sales Tax)
=
Earnings

What are direct travel-generated earnings?

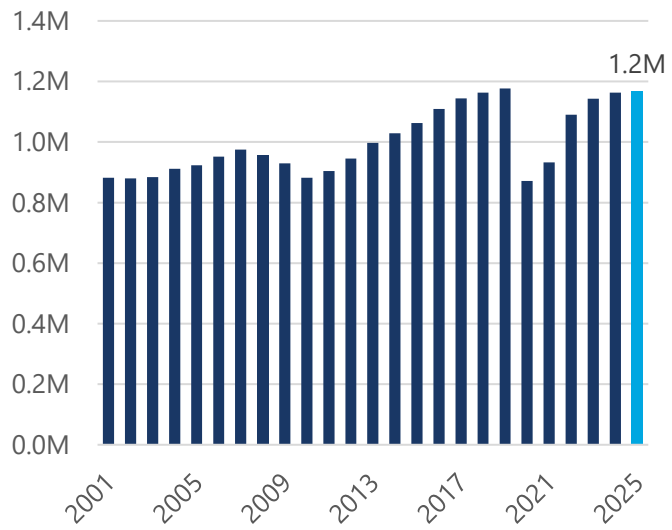

Direct travel-generated earnings represent the total after-point of sale tax income from travel spending. It includes wage and salary disbursements, proprietor income, and other earned income or benefits.

Earnings are an important measure of the benefit of the travel industry that flow to proprietors and employees. Because the travel industry is highly labor intensive, much of visitor-generated earnings flow to workers in the form of wages as opposed to owners of capital and intellectual property assets.

California Travel Impacts

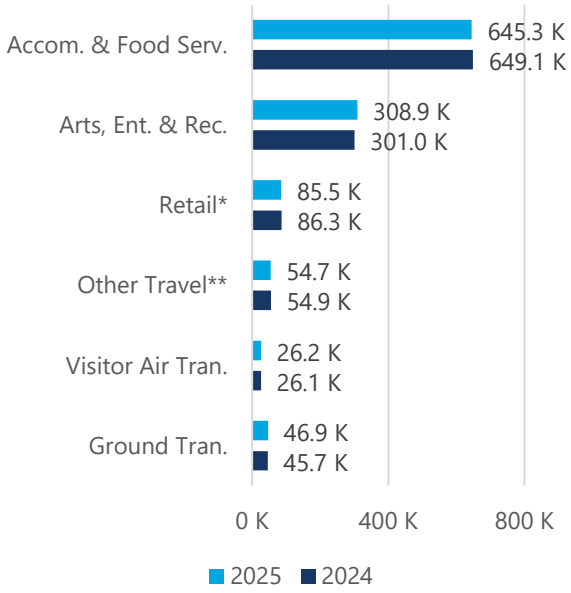

Direct Travel-Generated Employment

Direct travel-generated employment increased by 4,350 jobs in 2025.

Direct travel-generated employment grew from 1,163,120 to 1,167,470 jobs in 2025, a 0.4% increase from the prior year. Between 2015 and 2025, travel-generated jobs in California grew at an average annual rate of 0.9%.

Direct travel-generated employment in the Accom. & Food Serv. Sector decreased 0.6% in 2025.

*Retail includes gas stations.
**Other travel includes ground transportation to other California destinations, resident air travel, travel arrangement services, and convention/trade show services.

Employment in the Accommodation and Food Services sector declined by 3.8 thousand jobs. However, gains in Arts, Entertainment, and Recreation (up 2.6%) added 7,900 jobs, resulting in an overall increase in total employment.

In 2025, every **$1 million in travel-related spending** resulted in **7 jobs for the industry.**

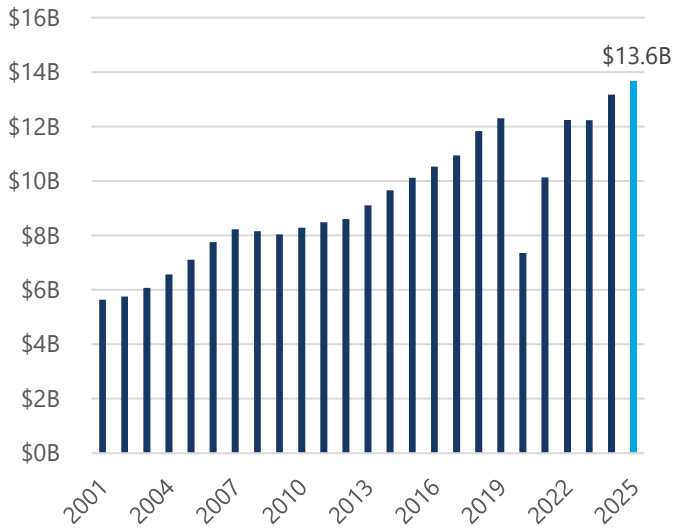

What is direct travel-generated employment?

Direct travel-generated employment refers to the total number of full- and part-time jobs directly attributable to travel spending. A significant share of many industries' earnings come from visitor-related spending. Part of these earnings are used to pay employees in the form of income and benefits. Based on average salaries for employees in the various travel-related industries in California, a total employment number attributable to travel can be reached. Employment figures reflect an annual average level of employment.

California Travel Impacts

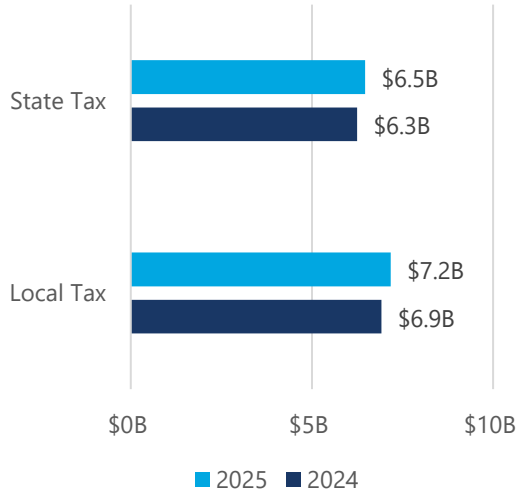

Direct Tax Revenue

Direct travel-generated tax revenue increased by $479.1 million in 2025.

Direct travel-generated taxes grew from $13.2 billion in 2024 to $13.6 billion in 2025, a 3.6% increase. Between 2015 and 2025, travel-generated tax revenue in California grew at an average annual rate of 3.0%.

Direct travel-generated tax revenue increased across state and local sources.

Between 2024 and 2025, local tax revenue increased from $6.9 billion to $7.2 billion or 3.7%. State tax revenue increased from $6.3 billion to $6.5 billion or 3.5% during the same period.

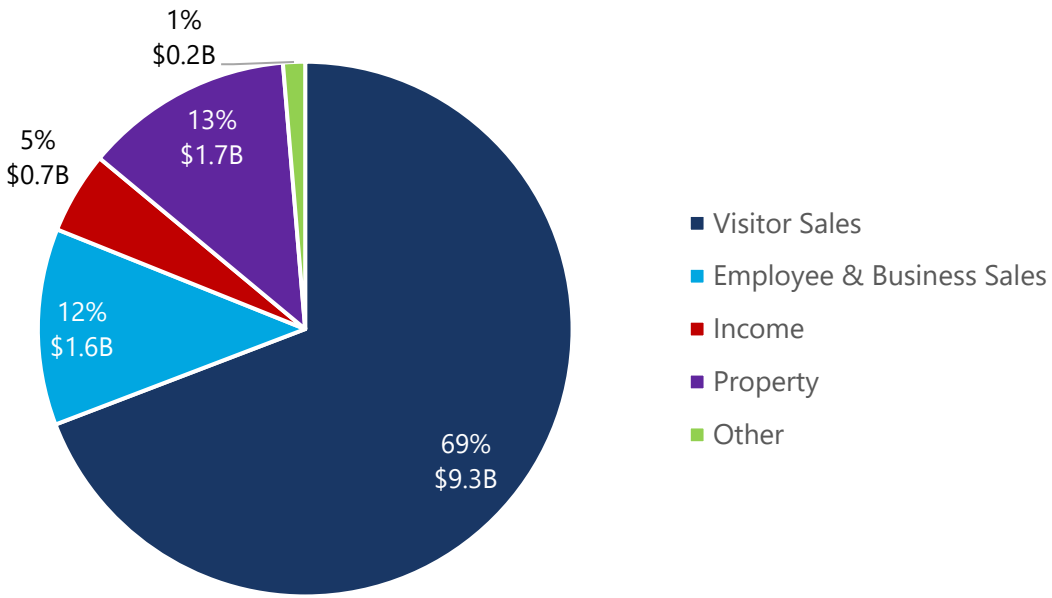

State tax + Local tax
=
Tax Revenue

What is direct travel-generated tax revenue?

Direct travel-generated tax revenue includes federal, state, and local tax revenue generated from visitor spending. **State taxes** primarily include lodging taxes, motor fuel taxes, income, and sales taxes. **Local taxes** primarily take the form of sales taxes imposed by cities, counties, and other tax jurisdictions in California. They also include a share of property taxes paid by travel industry business and employees.

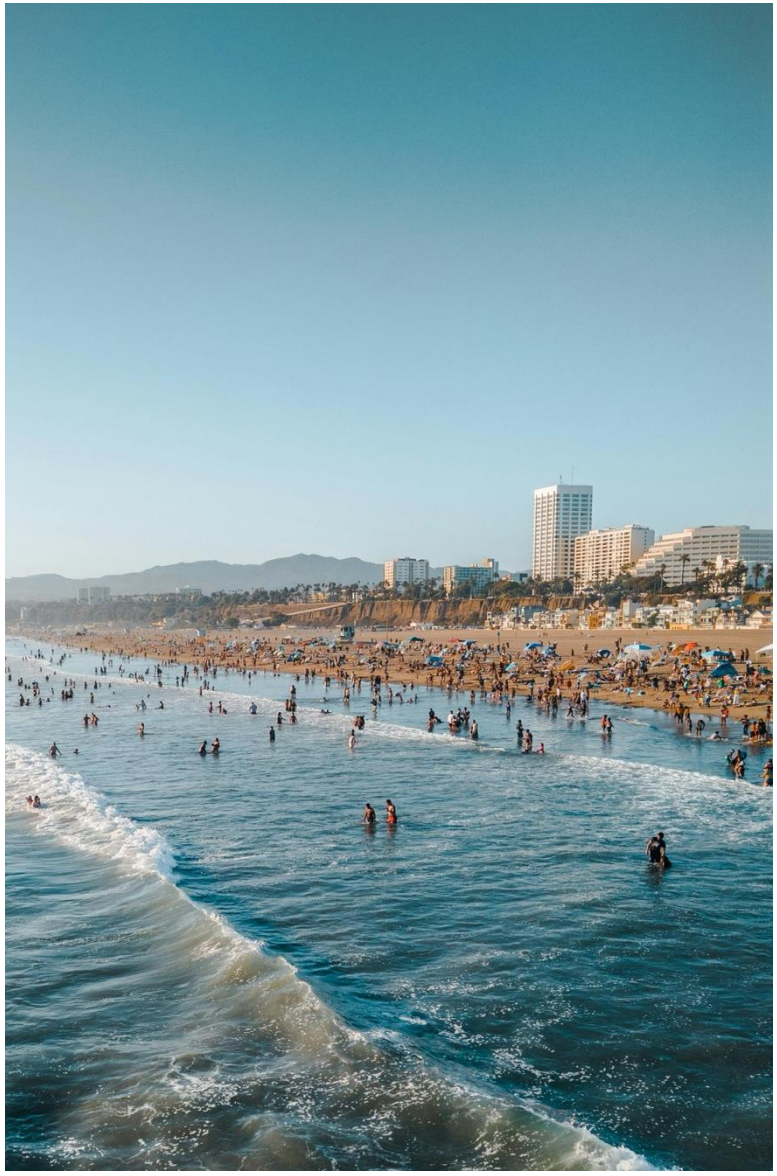

California Travel Impacts

Tax Revenue Detail, 2025p

Source: Dean Runyan Associates. "Other" travel generated tax revenue includes passenger facility charges for visitors who travel to California airports.

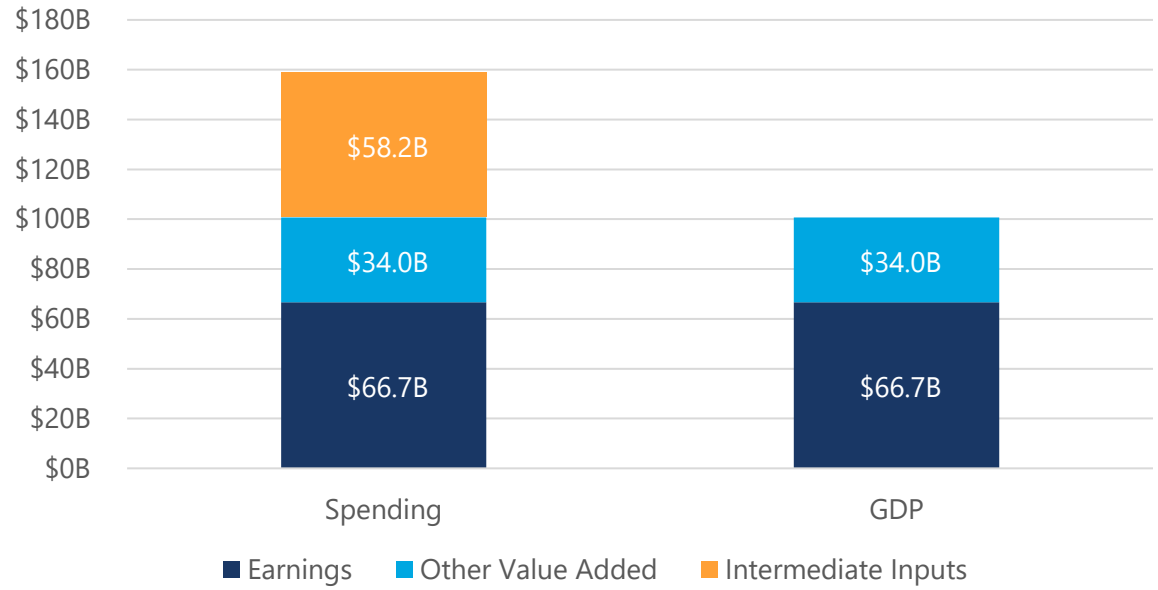

Approximately 69% of the tax revenue generated by travel-related spending is attributable to taxes paid by visitors.

California Travel Impacts

Travel Industry GDP

Direct Travel Spending and GDP of Travel Industry, 2025p

Source: U.S. Bureau of Economic Analysis, Dean Runyan Associates
Note: The estimates represent only the direct impact of travel spending. A portion of the inputs purchased by travel businesses in California will be delivered by other California firms that are not strictly part of the travel industry. Restaurants, for example, will purchase agricultural products from other California businesses. These inputs are sometimes referred to as "indirect" effects.

California travel industry GDP of **$101.1 billion represents approximately 2.4% of the total** California GDP.

GDP of the Travel Industry is 2.4% of the total state-wide GDP

Gross Domestic Product (GDP, also referred to as value-added) is a measure of economic activity that reflects the market value of the labor and capital used to produce goods and services. The GDP for a particular industry within a state excludes the intermediate inputs purchased by businesses from other firms in the production process. It includes payments to individual in the form of earnings, indirect business taxes to government, and other payments to individuals and corporations.

California Travel Impacts

GDP and Taxes on Production and Imports (TOPI)

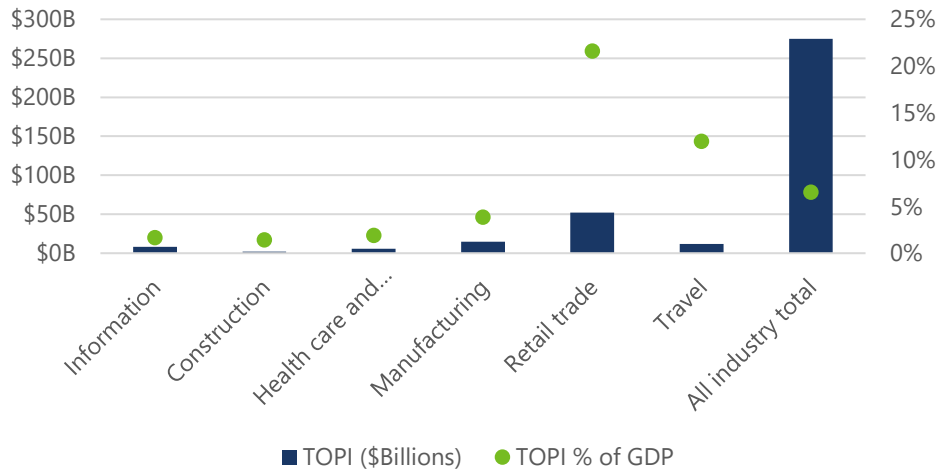

GDP and TOPI by Industry, 2025p

Description	GDP ($Billions)	TOPI ($Billions)	TOPI % of GDP
Information	474.4	8.0	1.7%
Construction	156.4	2.2	1.4%
Health care and social assistance	303.8	5.8	1.9%
Manufacturing	383.0	14.8	3.9%
Retail trade	241.0	52.1	21.6%
Travel	100.7	12.0	12.0%
All industry total	4,220.8	275.0	6.5%

*TOPI (taxes on production and imports) less subsidies include most taxes paid by businesses except for income taxes.

One way to compare industries is to look at how much businesses pay in taxes relative to their contribution to the economy. This is measured as taxes paid to government as a percentage of each sector's gross domestic product (GDP). The figures show these percentages across selected product and service industries in the state, including travel.

TOPI and TOPI as a Percent of GDP, 2025p

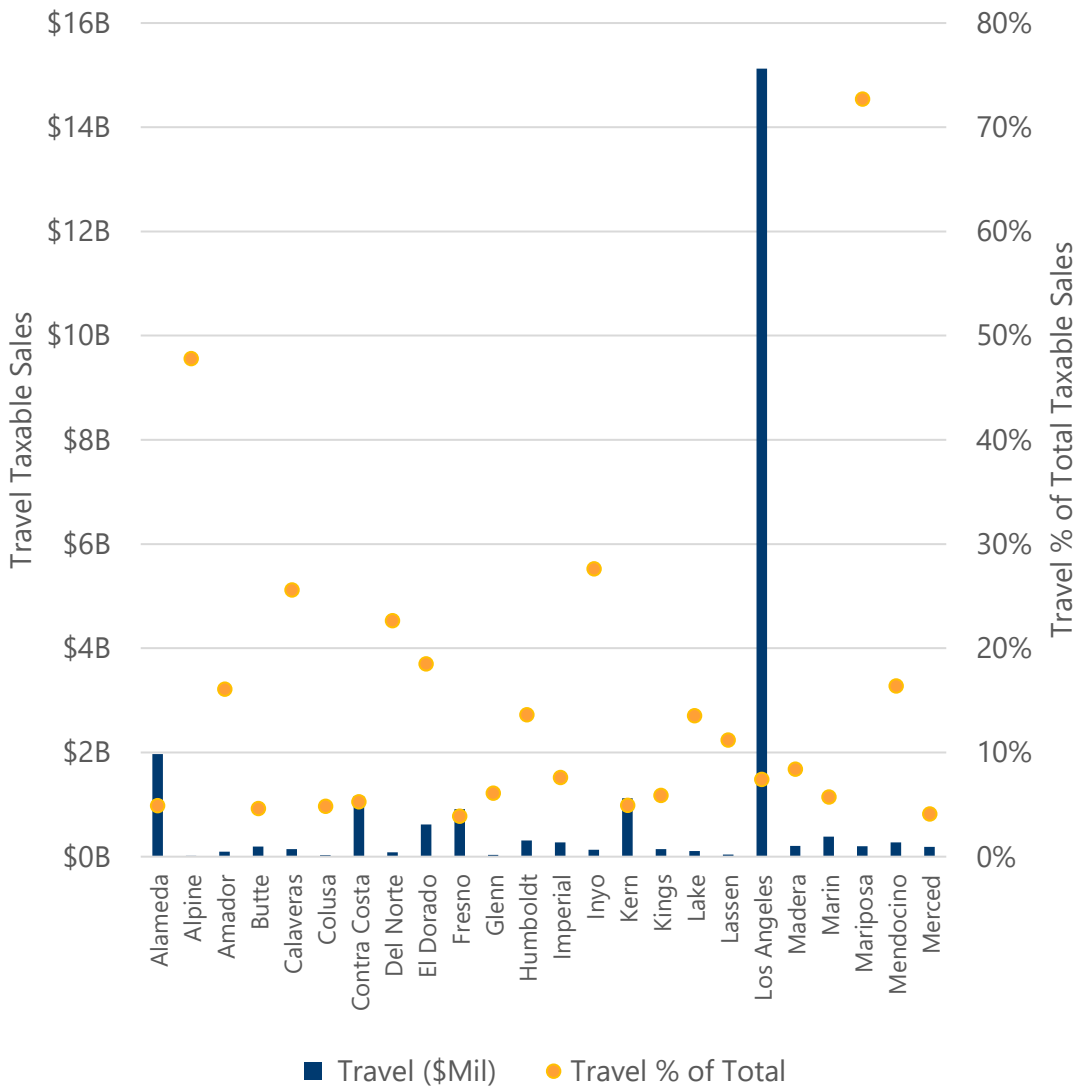

Compared to other industries, **Travel generates a relatively high percent of tax receipts.** Only Retail trade is higher.

California Travel Impacts

Total Travel Impacts

2025p Summary

The total travel impacts—which include direct and secondary earnings and employment attributable to travel spending—are presented in eleven major industry groups. These industry groups are similar, but not identical to the business categories used to report the direct impacts in this report. The specific industries that comprise these groups are listed in IMPLAN/Secondary Effects. The largest secondary impact industries are reported below.

- **Professional & Business Services** (Secondary impacts $15.0 billion in earnings and 154.5 thousand jobs) A variety of administrative services (e.g., accounting and advertising) are utilized by travel businesses. Employees of these businesses also purchase professional services.
- **Financial Activities** (Secondary impacts include $7.8 billion in earnings and 93.0 thousand jobs) Both businesses and individuals make use of banking and insurance institutions.
- **Trade** (Secondary impacts include $8.5 billion in earnings and 111.8 thousand jobs) Employees and travel businesses utilize service providers such as repair shops, laundry, maintenance, and business services.
- **Education and Health Services** (Secondary impacts include $10.2 billion in earnings and 113.7 thousand jobs) The secondary effects are primarily induced, such as employees of travel-related businesses use of medical services.

Indirect and induced impacts are the two categories of secondary economic impacts.

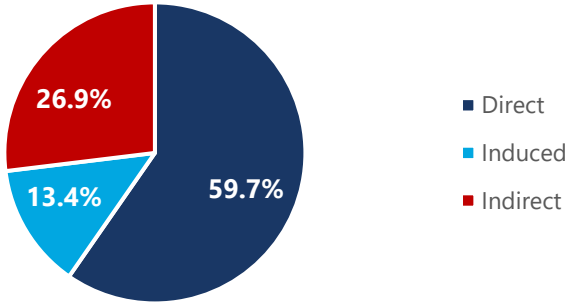

What are secondary impacts?

Secondary impacts are the result of re-spending of travel-related revenues. **Indirect** impacts represent effects associated with industries that supply goods and services to the direct businesses. **Induced** impacts represent effects of purchases made by employees in both the direct and indirect businesses.

Note: The total impacts reported here only reflect the impacts attributable to visitor spending. The indirect and induced impact estimates reported here apply to the entire state and do not necessarily reflect economic patterns for individual counties. In general, geographic areas with lower levels of economic activity will have smaller secondary impacts within those same geographic boundaries.

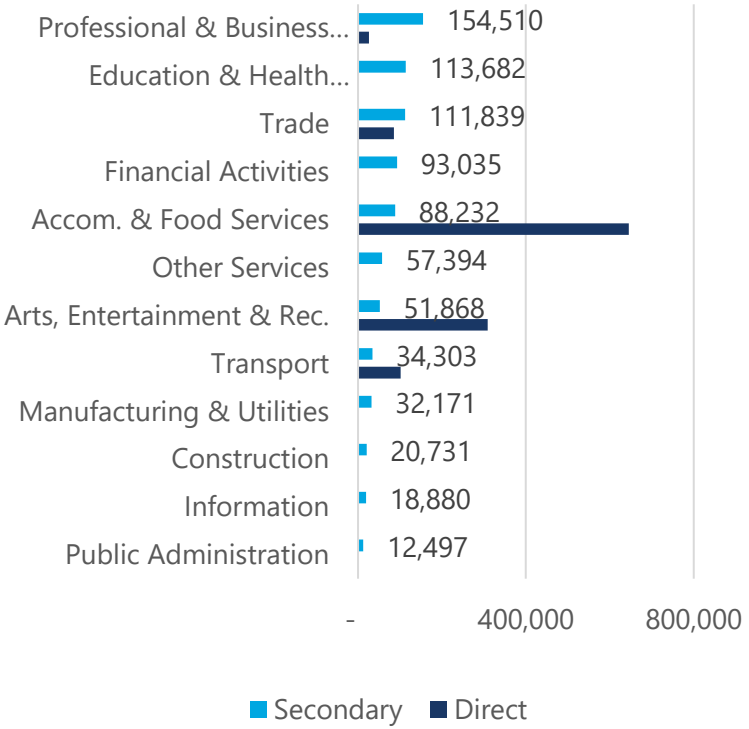

California Travel Impacts

Total Employment, 2025

In 2025, 40.3% of total employment was secondary. Secondary spending supported **154,510 jobs in the Professional & Business Services industry group.**

Glossary

Term	Definition
2nd Home	Homes under private ownership for personal use as a seasonal property where a lodging tax is not collected.
Day Travel	A trip that involves non-routine travel of greater than 50 miles to the destination and but no overnight stay in the destination.
Destination Spending	Direct spending made by visitors in a destination. Interchangeable with "Visitor Spending."
Direct Earnings	Total after-tax net income from travel. It includes wage and salary disbursements, proprietor income, and other earned income or benefits.
Direct Employment	Employment generated by direct travel spending. It includes full-time employees, part-time employees, seasonal employees, and proprietors.
Direct Spending	Expenditures made by consumers, combination of Visitor Spending and Other Spending.
Hotel, Motel, STVR	Accommodation types that house transient lodging activity.
Local Taxes	City and county taxes generated by travel spending.
Other Overnight	Combination of other overnight visitors who stay in campgrounds or 2nd homes.
Other Spending	Spending by residents on ground transportation to other California destinations, resident air travel, travel arrangement services, and convention/trade show services.
Private Home (VFR)	Personal residences used to host friends and family visiting overnight in the destination.
State Taxes	State taxes generated by travel spending.
STVR	STVR stands for "short term vacation rental." The category includes private and semi-private lodging rented by owners or property management companies (e.g., Airbnb & VRBO).
Visitor Spending	Spending by visitors in a destination.

Methodology

Travel Impacts Methodology

Primary travel impact analysis will make use of the Regional Travel Impact Model (RTIM), prepared and maintained by Dean Runyan Associates and used for most of our travel impact analysis since 1985. This model was developed to provide robust impact findings at small geography without reliance on annual survey research. This is a "bottom up" approach whereby analysis is conducted at the county level, then aggregated to regions and the state, allowing us to use the most detailed tax, employment, wages, and other data that are available. Our clients have selected this approach to provide particularly detailed and defendable findings for all parts of their constituency.

Because the model does not rely on annual survey research for its primary inputs, we work in other states with a variety of other visitor profile providers, including national panel managers or those making use of intercept or regional web methodology.
Analysis is conducted separately by type of visitor lodging, making use of data and modeling appropriate to each. Impact analysis associated with visitors staying in commercial lodging makes use of lodging tax data to calculate lodging sales, then employs expenditure distribution data for these types of visitors to calculate total sales and the distribution among expenditure categories. We maintain our own expenditure distribution database for each state we work in, but also make use of historic and current expenditure data, as available. Rental cabins, condos and other property are included in this category if lodging tax has been applied to sales.

Earnings, employment, and tax receipts are calculated using employment and wage data by business category, for each county, plus the applicable taxes on each type of expenditure. Tax impacts, such as for restaurant, fuel, and retail purchases, are calculated from spending amounts; totals will be checked against data from state sources.

Sales attributed to campers are calculated from campground inventory (separately for public and commercial campgrounds), camping occupancy data and average expenditures for camping parties. Expenditure data will be from expenditure databases that we maintain, augmented by visitor survey data available for California as available.

Other impacts are calculated in a manner like those for commercial accommodation travelers. Sales attributable to travelers staying in their own second homes, or in rented condo, cabin, and other accommodations, are calculated from inventories of these types of lodging and the associated utilization and expenditure data. Findings are made consistent if some of these sales have been subject to lodging tax. Second home inventories are from US Census sources and any local/regional data available. Other impacts are calculated in a manner like those for commercial accommodation travelers.

Methodology

Travel Impacts Methodology

Day travel spending is calculated as a factor of overnight spending, with the proportions based on visitor data for California travelers. This analysis will rely the most on visitor profile data provided by the profile contractor. Other impacts are calculated in a similar way as those for commercial accommodation travelers.

All spending estimates are summed for each county and separately for each business category with applicable data then used to calculate earnings, employment, and tax receipts. County totals will be mapped to regions using address and other location data for lodging, camping, and other rental accommodations using separate methods for each type of lodging.

In all cases, our data and methodology are transparent, allowing for reliable error trapping and effective review of findings. All findings are also checked against available comparable data, such as county-level employment data by industry from the US Bureau of Labor Statistics and lodging sales data from STR and Key Data.

Methodology

Historical Revisions

The estimates for the current year are considered preliminary and are updated the following year. In other words, the numbers shown in this report as "2024" are the final revised estimates, which replace the "2024p" (preliminary estimates) shown in last year's report.

At the state level, the revision of direct travel-related spending between 2024p and 2024 was only -0.7%. Some regional and county revisions to the 2024p estimates were larger than the historical average. Methodological updates were made to the 'Other Travel' category, which led to revisions across all travel impact categories mostly in travel spending estimates. See the following page for details on these changes.

The large revision in business and employee tax revenue reflects two factors: the source data used in these estimates typically lags one to two years behind, and calculating this figure requires forecasting all property taxes, sales taxes and household income across California not just within the travel industry. Our previous forecasts came in lower than what the newly released source data showed.

2024 Revisions to California Summary of Direct Impacts

*Other travel includes ground transportation to other California destinations, resident air travel, travel arrangement services, and convention/trade show services.

Methodology

Historical Revisions

California County-Level Estimates of Other Travel

"Other Travel" has been revised for 2022-2024 due to a change in methodology needed to better estimate the economic impact within this category.

"Other Travel" consists of four separate estimates:

- Gasoline expenditures by visitors traveling between California destinations (counties & regions only).
- California resident use of airport facilities taking outbound flights.
- Convention and Tradeshow organizers
- *Travel Arrangement & Reservation Services (NAICS 5615)*

Historically, employment and wage data from the Bureau of Labor Statistics Quarterly Census of Employment and Wages (QCEW) were used to create estimates of business activity associated with Travel Arrangement & Reservation Services. The QCEW captures total wages as defined under state law, which encompasses a broad range of compensation beyond regular earnings. This can include bonuses, the value of stock options, severance pay, cash value of meals and lodging, tips and other gratuities. Employer contributions to certain deferred compensation plans may also be included.

Starting in 2022, reported wages for travel arrangement businesses in several California counties exhibited significant volatility that was inconsistent with employment levels and with the underlying trend in the industry. In certain counties, year-over-year wage figures diverged sharply from what employment headcounts alone would suggest, producing estimates that overstated economic activity attributable to industry operations.

To address this, *the updated methodology anchors Other Travel estimates to employment rather than total wages*. Where wages in a given county and year showed clear signs of distortion relative to their own historical trend, an adjusted wage rate derived from that county's pre-distortion earnings history is applied in place of the reported figure. To reduce volatility in counties with non-disclosed data we decoupled from a broad state average to anchor towards the number of local business establishments. This approach results in producing estimates that better reflect industry conditions within each geography.

The restatement affects the years 2022 through 2024. Prior years are unaffected as the compensation volatility driving this adjustment was not present in the data before 2022. The revised series will be carried forward using the same methodology, with annual updates to be made as new data becomes available.

Methodology

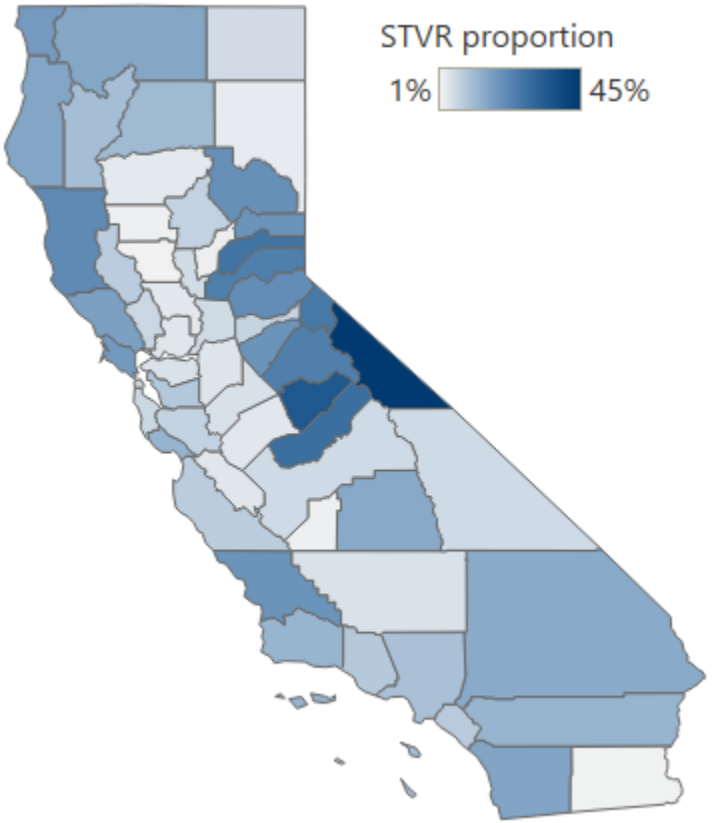

Short Term Vacation Rentals (STVR)

Starting in 2021, reporting includes a breakout of travel spending for visitors who stayed in Short Term Vacation Rentals (STVR) separately from Hotel, Motels. Each county's share of STVR lodging is based on a combined lodging total utilizing KeyData (for STVR performance) and STR (for hotel performance). The STVR share is then applied to each county's TOT receipts, as reported for the calendar year. With unique expenditure distributions applied for both lodging types for each county, we then estimate the remaining travel impact commodities such as Food Services, Retail, and Arts, Entertainment & Recreation, etc.

This estimated share of STVR is necessary due to the lack of reporting for this lodging in terms of TOT, and that KeyData and STR represent modeled lodging sales which may be greater than or less than TOT receipts. At the present time, only a small number of jurisdictions report TOT by type of lodging.

Regulations around STVR's and lodging taxes are determined at the local level. For our analysis, we assert that we are only concerned with taxable activity, as has been our longstanding position regarding travel impacts. We are not attempting to include non-taxable STVR stays, which may occur in communities across the state of California. Using this methodology, the results are less susceptible to overestimations of travel impacts.

Proportion of Visitor Spending by Visitors who spent the night in a STVR, 2025p

The table below demonstrates how our reported "Travel Industries" translate to the North American Industry Classification System (NAICS) codes.

Travel Impact Industry	NAICS Industry Code
Accommodation & Food Service	Accommodation (721) Food services and drinking places (722) Residential property managers (531311) Breweries, wineries, distilleries (312120, 312130, 312140)
Arts, Entertainment, & Recreation	Arts, entertainment, and recreation (71) Scenic and sightseeing transportation (487) Motion picture and video exhibition (51213) Recreational goods rental (532292) Tour operators (56152)
Retail	Food & beverage stores (445) Gasoline stations (447) Clothing and clothing accessories (448) Sporting goods, hobby, book and music stores (451) General merchandise stores (452) Miscellaneous store retailers (453)
Transportation	Rail transportation (482114) Water transportation (4831) Urban transit systems (4851) Interurban and rural bus transportation (4852) Taxi and limousine service (4853) Charter bus industry (4855) Passenger car rental (532111) Truck, trailer, and RV rental and leasing (53212) Parking lots and garages (812930)
Air Transportation	Scheduled passenger air transportation (481111) Support activities for air transportation (4881)
Others	Travel agencies (56151) Convention and trade show organizers (56192)

Note: Travel spending on breweries (312120), wineries (312130) and distilleries (312140) are included within the Food Service, Retail, Food Stores, and Recreation industries. It is likely that the bulk of travel-related spending on these alcohol-related NAICS codes occurs within the Food Service category. However, because experiences at breweries, wineries, and distilleries often include a significant experiential component, as well as opportunities for retail purchases, we are unable to allocate exact percentages to the above travel impact categories. NAICS codes are based on responses from individual organizations and are not always a perfect 1:1 alignment with our analysis.

Methodology

Secondary Travel Impacts

Secondary (indirect and induced) spending, earnings, and employment were estimated using IMPLAN. IMPLAN is a widely used, nationally recognized economic impact model, first developed by the U.S. Forest Service. IMPLAN provides estimates of the additional economic activity associated with the sale of goods or services to a traveler. This methodology has been packaged, along with the necessary data files, as IMPLAN Pro by the Minnesota IMPLAN Group, Inc. (MIG) of Stillwater, Minnesota.

Multipliers

Each industry that produces goods and services generates demands for other goods and services. These other producers, in turn, purchase goods and services. These indirect purchases (indirect effects) continue until "leakage" from the region (imports, wages, profits, etc.) stop the cycle. The repeating iterations are described by multipliers. Each of the multiplier types can be calculated for output, employment, and income (value added).

Data and Analysis

All impact amounts are expressed in current dollars using IMPLAN deflators based on the U.S. Bureau of Labor Statistics' Consumer Price Index. Through IMPLAN, direct employment from the RTIM model was used to estimate all the associated indirect and induced effects. Employment associated with retail trade was evenly divided between general merchandise stores and miscellaneous retail. Employment associated with ground transportation was divided between auto rental, gasoline service stations, and local transportation based on the expenditure distribution data used for the RTIM model.

IMPLAN Industry Groups

Accommodation & Food Services

- Food services and drinking places
- Hotels and motels, including casino hotels
- Other accommodations

Arts, Entertainment & Recreation

- Bowling centers
- Fitness and recreational sports centers
- Independent artists, writers, and performers Museums, historical sites, zoos, and parks
- Other amusement, gambling, and recreation industries Performing arts companies
- Promoters of performing arts and sports and agents for public figures
- Scenic and sightseeing trans and support activities for transportation
- Spectator sports

Wholesale & Retail Trade

- Building material and garden supply stores
- Clothing and clothing accessories stores
- Electronics and appliance stores
- Food and beverage stores
- Furniture and home furnishings stores
- Gasoline stations
- General merchandise stores
- Health and personal care stores
- Miscellaneous store retailers
- Motor vehicle and parts dealers
- Non-store retailers
- Sporting goods, hobby, book and music stores
- Wholesale trade

Transportation

- Air transportation
- Automotive equipment rental and leasing
- Automotive repair and maintenance, except car washes
- Couriers and messengers
- Rail transportation
- Transit and ground passenger transportation
- Travel arrangement and reservation services
- Truck transportation
- Warehousing and storage
- Water transportation

Government

- Federal electric utilities
- Federal Military
- Federal Non-Military
- Other Federal
- Government enterprises
- Other State and local government enterprises
- Postal service
- State & Local Education
- State & Local Non-Education
- State and local government electric utilities
- State and local government passenger transit
- Securities, commodity contracts, investments

IMPLAN Industry Groups

Professional Services

- Accounting and bookkeeping services
- Advertising and related services
- All other miscellaneous professional and technical services
- Architectural and engineering services
- Book publishers
- Cable networks and program distribution
- Child day care services
- Civic, social, professional and similar organizations
- Colleges, universities, and junior colleges
- Computer systems design services
- Custom computer programming services
- Data processing services
- Database, directory, and other publishers
- Elementary and secondary schools
- Environmental and other technical consulting services
- Grantmaking and giving and social advocacy organizations
- Home health care services
- Hospitals Information services
- Legal services
- Management consulting services
- Management of companies and enterprises
- Motion picture and video industries
- Newspaper publishers
- Nursing and residential care facilities
- Offices of physicians, dentists, and other health practitioners
- Other ambulatory health care services
- Other computer related services, including facilities management
- Other educational services
- Periodical publishers
- Photographic services
- Radio and television broadcasting
- Religious organizations
- Scientific research and development services
- Social assistance, except child day care services
- Software publishers
- Sound recording industries
- Specialized design services
- Telecommunications
- Veterinary services

IMPLAN Industry Groups

Other Services

- Business support services
- Car washes
- Commercial machinery repair and maintenance
- Death care services
- Drycleaning and laundry services
- Electronic equipment repair and maintenance
- Employment services
- Facilities support services
- General and consumer goods rental except video tapes and discs
- Household goods repair and maintenance
- Investigation and security services
- Lessors of nonfinancial intangible assets
- Machinery and equipment rental and leasing
- Office administrative services
- Other personal services
- Other support services
- Personal care services
- Private households
- Services to buildings and dwellings
- Video tape and disc rental
- Waste management and remediation services

Mining & Manufacturing

- All mining & manufacturing industries except for food processing

Agriculture & Food Processing

- Farming & manufacturing industries in food processing

Finance, Ins., & Real Estate

- Funds, trusts, and other financial vehicles
- Insurance agencies, brokerages, and related
- Insurance carriers
- Monetary authorities and depository credit intermediation
- Non-depository credit intermediation and related activities
- Real estate
- Securities, commodity contracts, investments

Construction

- Commercial and institutional buildings
- Highway, street, bridge, and tunnel construction
- Maintenance and repair of farm and nonfarm residential structures
- Maintenance and repair of highways, streets, bridges, and tunnels
- Maintenance and repair of nonresidential buildings
- Manufacturing and industrial buildings
- New farm housing units and additions and alterations
- New multifamily housing structures, nonfarm
- New residential 1-unit structures, nonfarm
- New residential additions and alterations, nonfarm
- Other maintenance and repair construction
- Other new construction
- Water, sewer, and pipeline construction
